

PRODUCTS

The layout and function of our B.E.S.T. Inlines are all exactly the same. They are available with the following optional ends/fittings:

PRODUCT CODE- 322B: (B = 3/4" Bare Threads) 1 micron Inline with bare 3/4" threads. Allows you to add your own fittings.

PRODUCT CODE- 322H: (H = Hose fittings) 1 micron Inline with standard plastic hose connectors.
* Our most popular model

PRODUCT CODE- 322HB: (HB = Hose fittings - Brass) 1 micron Inline with brass hose connectors.

PRODUCT CODE- 322HL: (HL = HoseLink Fittings) 1 micron Inline supplied with a set of two Hoselink connectors. (2 x HoseLink Item No. 2430 - see www.hoselink.com.au for more details.)

PRODUCT CODE- 322T: (T = 1/2" Threaded Connection) 1 micron Inline with reducing bushes. This allows you to install your own standard household sized plumbing fittings. Also supplied with 2 x mounting brackets.

Optional Extra:

PRODUCT CODE- 725: Set of 2 Mounting Clips - Suits all of our Inline models. (Note: A set of these clips is included with the 322T Inline.)

B.E.S.T. Water Filters also has a selection of other products available to compliment our Inline range. Please see our website for more details.

PLEASE NOTE:

You can buy directly from us - the manufacturer - via our website. Or view our list of Australian resellers, which are also on our website.

Specifications

1-micron for chemical, dirt and cyst prevention.

	1 micron Rating ~	
Model Number	322h	322t
Connection	3/4" BSP Threads fitted with standard Hose Connections	1/2" BSP Threads (no fittings supplied) & mounting clips
Recommended Flow Rate*	6-10L/min*	6-10L/min*
Dimensions	W-56mm x L-285mm	W-56mm x L-285mm
Life^	5000 L^	5000 L^

*This is a recommended flow rate. Higher rates are achievable, but the slower the flow of water, the more contaminants are removed, which improves taste.

^The 'Life' is rated on it's ability to remove chemicals. The lifespan is dependant upon the quality of water being filtered. Highly chlorinated areas can cause the life to be reduced. (The rating given is based on the max. allowable level of chlorine.) There is NO time limit. Using the filter in areas where there is an excessive dirt content, may cause the filter to clog where back-flushing is no longer effective.

~ 1-micron requires pump pressure of apprx. 35psi to work. In highly chlorinated or high mineral areas, the life can be shortened.

IT'S SIMPLY INLINE

The **MOST POPULAR** solution is to install it inline on your hose line when directly connected to mains (caravan park) water (See Direct Connection Scenario) and/or when filling your tanks (See To Fill Your Tanks Scenario).

To use this method, you will need the 322h (1 micron Inline with Hose Connections).

- NO INSTALLATION REQUIRED
- KEEPS YOU SAFE by killing bacteria using the Original SilverSafe® Process
- FRESH TASTE by removing chemicals & odour
- SAVES YOU MONEY — only replace it when the carbon runs out... NOT when the bacteria sets in!

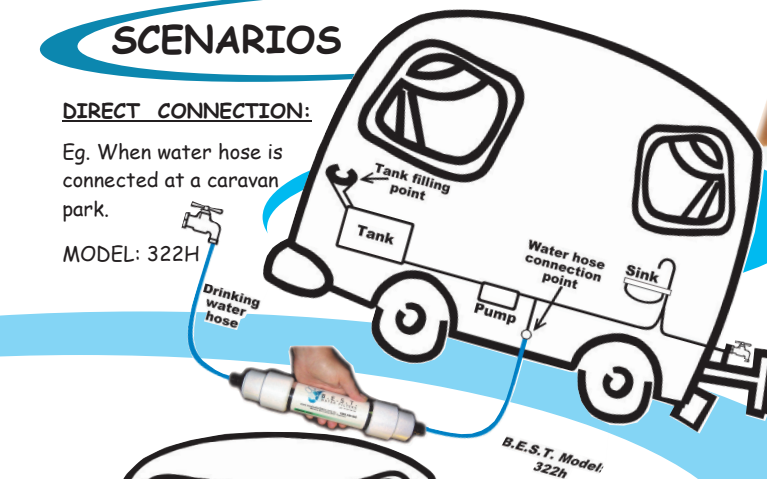

SCENARIOS

DIRECT CONNECTION:

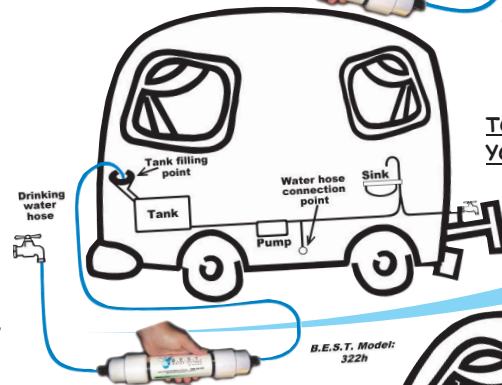

Eg. When water hose is connected at a caravan park.

MODEL: 322H

TO FILL YOUR TANKS

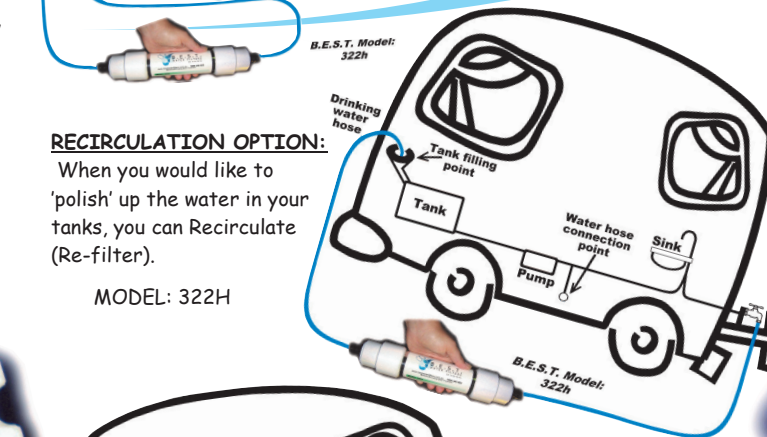

MODEL: 322H

RECIRCULATION OPTION:

When you would like to 'polish' up the water in your tanks, you can Recirculate (Re-filter).

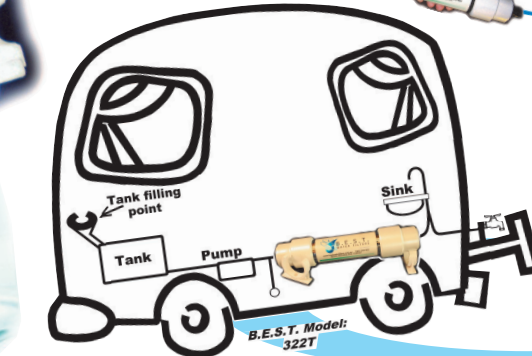

MODEL: 322H

BUILD IT IN:

When would like to filter your 'Drinking Water Only', build it in after the pump.

MODEL: 322T

DRINKING WATER ONLY

If you use a lot of water—i.e. Shower, toilet, etc. and are worried about 'flushing away' the filters' useful life - then the solution may be to just install an inline at your drinking water point. (See Build It In Scenario.)

For this method, a 322t (1 micron Inline with 1/2" BSP Threads), is the best solution. Or the 322t can be installed inline anywhere after the pump.

HAND / FOOT PUMPS

If you have a hand/foot pump system, the 1 micron Inline is too fine to pump through. A 322h used when filling tanks, is ideal. (See Scenario: To Fill Your Tanks.) Then all water is filtered and this keeps your tanks clean.

All of our B.E.S.T. Alternative Inline Range & Alternative Cartridge Range incorporate the **ORIGINAL SilverSafe® Process!**
