TANK MAINTENANCE

The APTUS Premium Program

This program is the absolute gold standard of quality, flavour, oil production and shelf life.

This is the program for the grower looking to produce the absolute best flower they can or any extraction artists looking to increase the quality, colour and yield of their extracts.

This program should not be used in DWC, NFT or aeroponic systems.

Cultivators running these systems and substrates should follow our CLEAN program.

It's recommended to mix fresh feed daily, bi-daily or every 3 days at a maximum to reduce the build-up of biofilm in tanks and irrigation systems. Fresh is best!
