

# Rubber Matting

Rubber matting is a versatile and durable material that is perfect for a variety of applications. It is made from high-quality rubber that is resistant to chemicals, heat, cold, and wear. It is also non-slip, making it a safe choice for areas where there is a risk of slips and falls.

Rubber matting is available in a variety of thicknesses, colors, and styles to suit any need. It can be used to protect floors in garages, workshops, factories, warehouses, commercial kitchens, hospitals, schools, gyms, and other high-traffic areas. Rubber matting can also be used to create a safe and comfortable walking surface in outdoor areas such as patios, decks, and walkways.

In addition to its durability and safety features, rubber matting is also easy to clean and maintain. It can be hosed down or swept, and it will not fade or crack over time. Rubber matting is also a sustainable choice, as it is made from recycled rubber.

Material	Up to 70% Recycled Natural Rubber	Weight	From 300gms./sq.m. + 5%
Roll Width	0.10m > 1.5m Metre	Max Roll Length	10 Metres
Thickness	3mm > 5mm	Tensile Strength	3.5 – 4MPa
Colour	Black	Pattern	Smooth, Checker, Coin
