Pathology and diagnostic laboratories

Specialized solutions for a growing demand of nutrition tests
Nutritional tests for pathology labs

We are ready to help optimize your nutrition testing activities through:

- Design and manufacture of customized sample collection solutions.
- Validated nutritional analytical methodologies (GC, MS) and related laboratory supplies.
- Automated sample preparation for fast, high-throughput, low-cost nutrition testing.

Solutions for sample collection

DBS cards and kits

Trajan has expertise in dried blood spot technology and microsampling devices, to allow cost effective collection, transportation and storage of patient samples for your laboratory.

Dried blood spot cards (DBS) and sample collection kits designed for use by health care professionals, can be customized with your branding.

hemaPEN®

hemaPEN® is a microsampling tool that enables the collection of four volumetrically fixed, accurate and precise, samples from a single source. Where there is no option to compromise, the hemaPEN is designed to maintain sample integrity for quantitative analysis and enable information-rich decision making. It is an easy to use advanced precision microsampling tool that can be used by anyone in any place.
Laboratory supplies

Trajan offer customized laboratory supplies including GC and LC columns and analytical accessories.

Automation platforms

In order to cope with the growing demand of nutrition tests, Trajan offers customized instruments for automated extraction, derivatization and sample injection, improving sample throughput and overall laboratory efficiency. Our instruments come complete with service agreements, installation, commissioning and training.

Analytical test development service

Trajan offers, with a very short turnaround time, an analytical testing service for nutritional panels in its laboratories or through partnerships, for instance with the SAHMRI nutrition laboratory in Adelaide, Australia.

If our facilities are not in a suitable geographical location for your operations, we will choose a closer analytical testing laboratory equipped with Trajan methodologies and instrumentation.

SAHMRI nutrition laboratory, Adelaide, Australia.
Trajan is your partner for nutrition testing, operating globally with R&D centers, manufacturing facilities, commercial operations and customer support facilities in Australia, USA, UK, Europe, Japan and Malaysia.
