COMPATIBILITY GUIDE

NOISEFIGHTERS GEL EAR PADS WITH RELIEF CUTS

Our innovative, glasses-friendly gel ear pads can mount to nearly any headset that accepts a 4" tall x 3" wide design. Simply peel off the original pads, clean off any residue, and apply our adhesive-backed pads. There is a rigid outer lip that locks into the retaining clips found on Howard Leight Impact Sport and similar headsets, plus a specially-engineered, pressure-sensitive adhesive that provides a secondary method to secure the pads. This adhesive is non-permanent, and pads can be removed dozens of times without degrading the bonding strength. Adapter plates are available to mount our pads to an even wider variety of headsets. Please visit the NoiseFighters website for additional information on compatibility and for videos regarding proper installation.
