

## FEATURES

- **Cooling:** 1-2 hour iPad cooling duration\*
- **Conduction:** IceCase holds our IceBloq directly against the iPad to conductively cool key components in the iPad to maintain thermoregulatory stasis.
- **Condensation-free:** IceBloq, our magical conductive cooling engine, is filled with a paraffin-based phase change material to extract heat from the iPad without the presence of moisture.
- **Quick-swap:** Inspired by our work in military/law enforcement, IceBloq swaps out quickly and intuitively for unlimited cooling capability
- **Solid State:** No batteries or fans, no moving parts to break..
- **SpeedSlots:** Future-proof SpeedSlots facilitate attachment of our growing suite of productivity tools like SunShield or Strap Loops for the IceCase Strap Kit and enabling IceCase to evolve with the needs of a demanding and competitive world.
- **SunShield:** SunShield reduces glare and keeps the sun off of your iPad, to reduce heat load. An optional Veltex hook-receptive loop fabric covering makes it easy to attach important documents like menus or training materials to your SunShield.
- **Hands-free:** IceCase uses the same SwiftClip connection system found on our high-tech IcePlate EXO® ultralight ventilated plate carrier. SwiftClips effortlessly connect IceCase to IceVest HiVis or IceVest Black for retention and hands-free carry.
- **Modular:** Designed for iPad 10.2, IceCase iPad Cooling Case is as adaptable as it is functional with Adapters that allow IceCase to be used with iPad 9.7 and iPad Mini (5th and 6th Gen). iPad Pro and iPad Air coming 2023.

*\*Specific times may vary depending on solar exposure, ambient temperature, battery status, charging state, CPU load, etc.*

*IceCase with SunShield and optional Veltex covering*

*IceCase with IceBloq magazine*

*IceCase for iPad 10.2 (7th-9th gen)*

*IceCase for iPad 9.7 (5th-6th gen)*
