Brajak Vitberg is an art and design studio,
founded by two architects from Ljubljana, Slovenia in 2018.

We are striving to design craft elements and make them
timeless through experimental designing process.

The studio creates a range of products from handmade and
limited small series to one piece unique products,
inspired by materials and forms that create incomplete perfection.

A close-up photograph of a zebra's back, showing the characteristic wavy stripes in shades of brown and tan. A prominent vertical crease runs down the center of the image, where the two halves of the zebra's back meet. The texture of the fur is visible, and there are some small, dark spots and fibers scattered across the surface.
