

# ELITE AND HDS LIVE GPS BRACKET INSTALLATION

## PROVIDED HARDWARE

4 Push Pins  
 #6-32 x 1" SS Phillips Pan head screw  
 #6-32 Zinc Nylock Nut  
 #6 Zinc Washer

## TOOLS NEEDED

Drill  
 Oscillating Multi tool with blade  
 1/4" Drill bit  
 Silver Sharpie

## INSTRUCTIONS

1. Remove cover on dash to expose the factory Ride Command mounting hole.

2. Place bracket on dash where it will be mounted.

a. Mark the 4 mounting holes with a silver sharpie. There are two on top and two on the bottom.

i. Use a 1/4" bit and drill all 4 holes

b. Mark and cut dash so the back of your GPS can recess into the hole.

3. Mount GPS to bracket.

NOTE: the Elite model has 4 individual covers in each corner and the HDS Live has a bezel around the whole GPS that needs to be removed to expose the through holes.

4. Run power to GPS and connect.

5. Secure bracket to dash with 4 push pins.
