

VersiVision - Fiber Optic Video

FVC18 - 18-Slot Chassis

Product Features

- 19" Rack-Mount
- Up to 18 Available Module Slots
- Dual Auto-Switching Power Supplies
- Plug-and-Play Design
- No Adjustments Required
- Modules are Hot-Pluggable

Product Description

The VERSITRON **VersiVision** FVC18 Chassis can accommodate a combination of up to eighteen one/two/four/eight channel video modules and video/data modules. The chassis employs dual 110/220VAC Auto-Switching Power Supplies which reduces the possibility of a single module failure causing a shutdown or a major failure of other modules within the chassis. The high reliability and stability ensures that if one module shuts down, the operation of the other modules remains unimpaired. Two air-cooling fans are installed inside to further strengthen the superior performance of the system and eliminate the necessity for periodic maintenance. Status information can be read through the LED indicators on the installed modules. All of the modules installed in the chassis are hot-pluggable, which makes it unnecessary to power-down the chassis when replacing modules.

Technical Specifications

Input Voltage:	Dual 100 ~ 240VAC - 50/60Hz
Power to each Module:	5VDC - 400mA
Power Consumption:	36W
Number of Slots:	18
Dimensions:	17.60 x 11.81 x 5.31 Inches
Weight:	33 Pounds
MTBF:	> 100,000 Hours
Operating Temperature:	-35° C to +50° C
Storage Temperature:	-40° C to +85° C
Relative Humidity:	0% to 95% (non-condensing)
