

Ring Sizing Chart - Print at Home

Before using the ring chart to find your fit, make sure this guide is printed on US Letter Size paper (8.5 x 11") and scaled to 100% ("Actual Size"). To check the accuracy of your printout, position a credit card on the line or a U.S. quarter in the circle below. The scale is correct if the credit card and line length match and/or the quarter fits perfectly within the circle.

Measure by matching your current ring

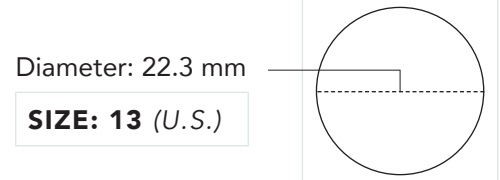

1. Select a ring you already own that perfectly fits the finger on which you will wear the ring.

2. Align your ring with the circle below that most closely matches in size. The inner edge of your ring should align with the outer edge of the circle. The number is the inside circumference of your ring.

Option 2 — Measure your finger with string or strip of paper

1. Cut a length of string, floss, or paper and wrap it around the base of the intended finger.
2. Use a pen to mark where the floss or string first overlaps.
3. Stretch the length of string out along the ruler to the right to find your ring measurement.

Tip: String and floss can stretch, so try not to pull too taut around your finger.
