

RESINTINT™

COLOR MIXING GUIDE

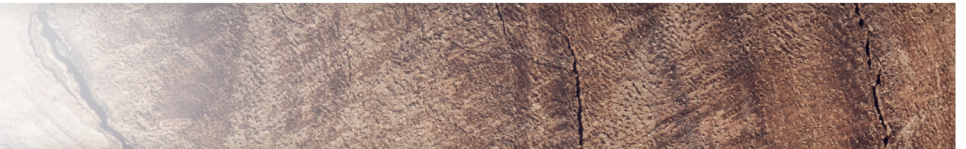

1 primary, secondary + tertiary colors

2 neutrals

3 browns

4 blues

5 pastels

5 pearls

6 adjusting opacity

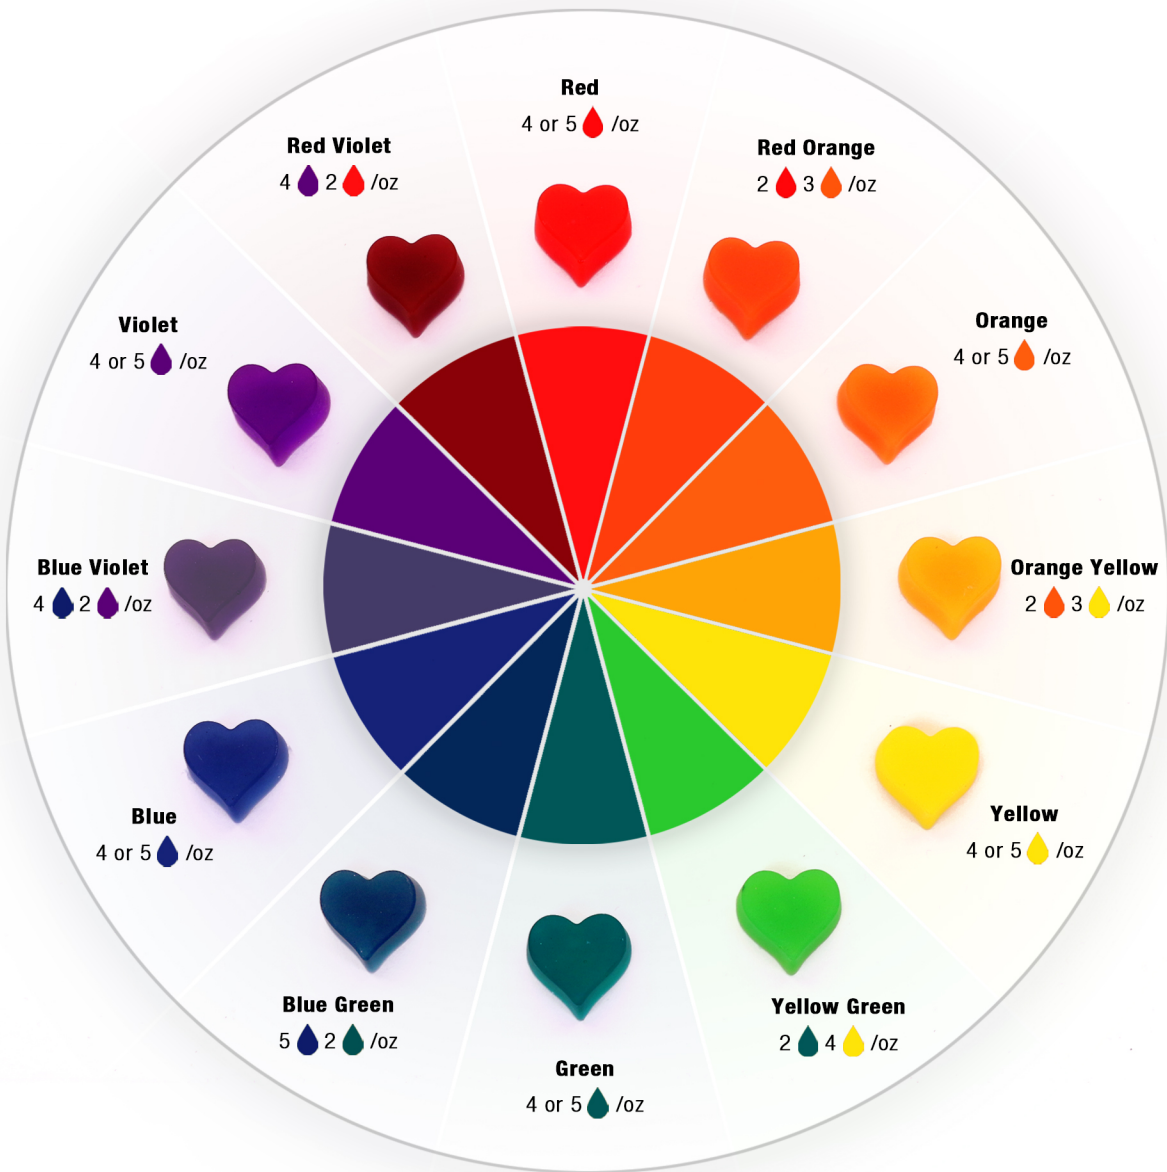

7 muting a color

RESINTINT™ ORIGINALS COLOR MIXING

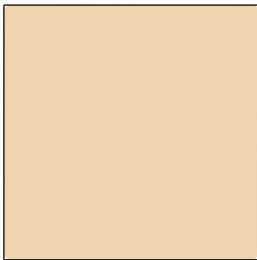

Using the colors from our **ResinTint Originals**, drop in the recommended amount of tint for each ounce of ArtResin to achieve the **12 primary, secondary, and tertiary colors**.

RESINTINT™

MAKING NEUTRAL COLORS

To make a basic sand color, use our **Neon ResinTint** plus **White**.

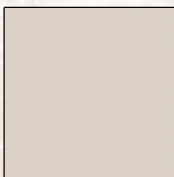

The basic formula:

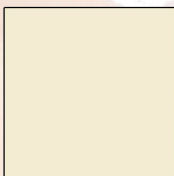

3  neon green: 2  neon pink: 2  neon yellow: 5-7  white / oz

Peachy nude color: Add a drop of Neon Pink 

Greyish neutral color: Add a drop of Neon Green 

Bright sand color: Add a drop of Neon Yellow 

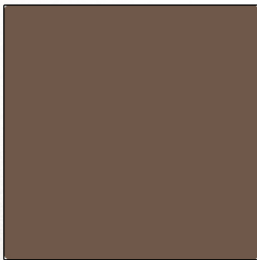

You can play around with the ratios a bit to get the exact tone you're looking for.

Lighter or Darker Sand: Add or subtract drops of white 

RESINTINT™

MAKING BROWNS

To make a deep brown color, use our **Original ResinTint**.

The basic formula:

2  red: 2  green: 2  yellow: white as needed  / oz

Adjust this basic formula to get the exact shade you need:

Mahogany Brown: Add a drop of red or violet  

Olive Brown: Add a drop of yellow 

Greyish brown: Add a drop of blue 

RESINTINT™

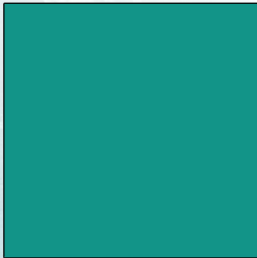

MAKING BLUES

To make specific blues, use our **Original ResinTint**.

Deep Ocean:

3  blue: 3  black: 2  white: 1  purple / oz

Caribbean:

3  blue: 3  green: 4  white / oz

Sky:

4  blue: 12  white / oz

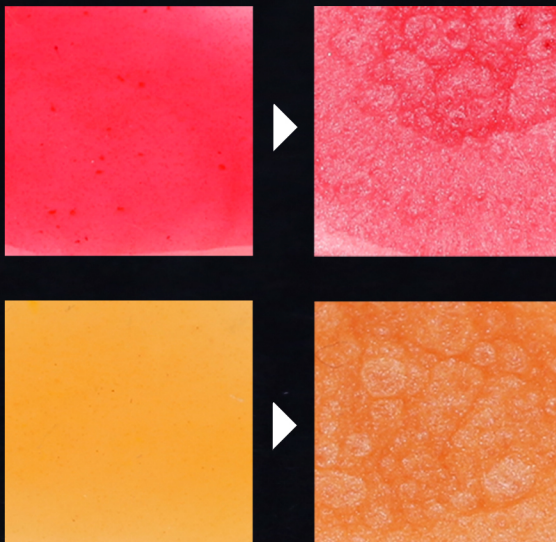

RESINTINT™ MAKING PASTELS

You can make any color a pastel by adding white.
Add equal parts of white ResinTint to drops of coloring.

MAKING PEARLS

Make any color pearlescent by adding Metallic White
from our Metallic ResinTint package.

RESINTINT™

ADJUSTING OPACITY

To create a **translucent** color effect, only add a few drops of ResinTint to your resin.

For a **deeper translucent** color, try using ArtResin Alcohol Ink instead of ResinTint.

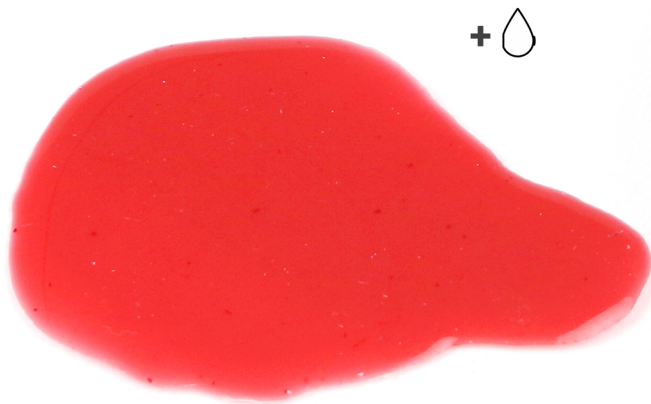

To create a completely **opaque** color, just add a few more drops of color than usual.

note: You can add tint up to 6% of the total volume of resin.

You can also create an opaque color by adding a small amount of white or black to your mixture. This can change the color a bit, so be careful not to add too much — A little goes a long way!

RESINTINT™

MUTED COLORS

To achieve muted colors like sage green, dusty rose, or periwinkle blue, try adding a small amount of color from the opposite side of the color wheel.

Examples:

Sage Green

2  Neon Green : 1  Neon Pink : 3  White

Lavender

1  Neon Pink : 3  Original Blue : 3  White

Butter Yellow

3  Original Yellow : 1  Neon Pink : 3  White

Periwinkle Blue

5  Original Blue : 1  Neon Pink : 3  White

Peach

4  Original Yellow : 2  Neon Pink : 3  White

Olive Green

2  Original Green : 1  Neon Pink :
3  Original Yellow : 2  White

Dusty Rose

2  Original Blue : 2  Neon Pink : 3  White
