

Rudy Says, "Science is AWesome"

Rudy's Butterfly friends love flowers! But there is more to a flower than just pretty petals!

Parts of a Flower

classroomclipart.com

FLOWER FUN FACT!

The largest flower in the world is the *titan arums*, which produces blossoms 10 feet high and 3 feet wide. It also smells REALLY bad!

Pick a favorite flower. Look carefully and try to find as many of these parts are you can!

Next, draw a picture of YOUR flower here. Then, label or tell about the parts you found.
