Notes to Pricing:
-Minimum 1 Year Term on Service Contract
-Airtime rate per minute also applies to airtime usage and other call management features and data. Each partial minute of airtime is billed as a full minute for Satellite Telephone Service.
-Included monthly airtime minutes will not be "rolled over" to subsequent month or pooled within an account.
-There is an extra \$10 set-up fee for each call management feature requested. (ie: call waiting, call forwarding, etc.)
-Long distance toll rates included in the per minute airtime rate for all calls terminated in the continental United States, Alaska, and Hawaii. International calls are billed at the specified airtime rate plus applicable international toll (based on AT&T's residential direct dialing rates -- see http://www.consumer.att.com/global/english/). International tolls are rated to the prevailing Eastern Time and may vary by time of day.
-Prices are in US Dollars. Remote Satellite Systems® reserves the right to modify/change or delete plans as necessary
-MSAT-G2 Tracking is offered strictly with the MSAT-G2 Satellite Radio. The Standard MSAT-G2 Tracking option assumes subscribers will use their own application in accordance with LightSquared's Application Interface documentation. The Enhanced MSAT-G2 Tracking option provides access to a web-based mapping application package. Position reports are automatically generated for telephone (or dispatch) calls; additional polling requests by subscriber are subject to the "per poll" fee.
-For PTT plans, all subscribing units in the same talk group must be subscribed to the same number of beams. Beam coverage is based upon the talk group not the individual MSAT ESN terminal/phone.
-Remote Satellite Systems Terms and Conditions apply to all Post-paid airtime subscriptions and Pre-paid airtime purchases.
