## Introducing commands

Commands are the actions that are taken when a cell is selected by a user. It is easy to add a sequence of commands to a cell which can perform a wide variety of functions.

The list of commands available can be viewed by clicking on **Create Cell**.

Commands are grouped into categories to help you find what you are looking for.

Click on a category, and **Next** to view the commands available.

C Tip If you aren't sure which category your command is in, you can use the search box in the top right.

## Adding commands

You can add more commands to a cell by clicking on Add Command.

The order in which the commands are executed can be changed by dragging and releasing a command up or down the list.

A command can be deleted by clicking on the X in the top right.

## 🗘 Tip

You can also add commands to a grid, which will be executed every time it is opened. Click on the **Grid** tab, and then **Grid Commands**.

GRID	SET	HOME	STYLE	LAYOUT	GRID		
Finish Editing	9 Undo	Background	Grid Commands	Scan Blocks	Audio Highlighting	Computer Position Control • •	Size
