

Wire A-Frame Support

Support cucumbers, squash and flowering vines on our Wire A-Frame Support. Unfold the support and push the legs a few inches into the soil. For additional stability, especially in windy locations, we recommend attaching it to a sturdy stake to anchor it to the ground.

Maintenance

This support is made of steel and treated with a powder-coated finish, which will age to a rusty patina. To prolong the life of your support, we recommend storing it under cover at the end of the season. If the powder-coated finished is nicked, touch it up with exterior paint or polyurethane to prevent rust.
