Ötzi el hombre de hielo

Ötzi es una momia natural. Fue asesinado por una flecha hace 5.300 años en los Alpes. Su cuerpo se congeló tan rápido que sus ojos todavía están en sus órbitas. Su cuerpo arrugado fascina a los científicos. Por lo general, un cerebro se licua. Pero Ötzi todavía tiene la suya. Está liofilizado en su cráneo.

La gente en la década de 1600 usaba carne de momia en su medicina.
