

HIGH EFFICIENCY SOLAR LIGHTING

LES JARDINS[®]

AIX-EN-PROVENCE

www.lesjardins.solar

A note from the CEO...

10 years ago, we at Les Jardins set the ambitious goal of enhancing solar-powered lighting in terms of design and technological efficiency. Our mission was to eliminate the all too familiar, "cheap, short lifespan, and disposable" product as the only option for solar lighting and create a device built on quality, durability, and most importantly, sustainability.

Today, our efforts have achieved global recognition, bringing light to prestigious hotels, pristine coastlines, and fine homes. Like our lamps, nature never goes out of style. They are meant to last, a timeless design that over the years can be enhanced with a newer solar bulb. Upgrade and recycle!
