

INKA Table Light

INKA table light is one of a kind. Made of teak and aluminum in bronze finish, INKA is integrated with ASB200 round solar module featuring 200 lumens and warm white light temperature of 2500K.

SMART MODE:

When the solar module switches on automatically at nightfall, it knows both how much energy it has and how many hours it must provide light for. It adapts its intensity so as to remain active all night, with greater power generated at the beginning and end of the night. It switches off automatically at daybreak.

Size: 8"x8"x8"
