

Card Printing Solutions

BROCHURE

ACCREDITATION & EVENT **CARD PRINTERS**

Flexibility for oversized cards and the professional's choice for ticketing and accreditation purposes. Easy to use the ECP-XL is based on a reliable dye sublimation printer and features a Plug & Play driver for Windows and Mac, standard native USB, a convenient display and a two-year warranty. As well as printing at low sound levels, one of the ECP-XL Printers outstanding strengths is its fast printing speed; Up to 180 full colour cards per hour and 1,400 monochrome printed cards per hour. Preprinted XXL-cards sized 88 x 124 mm or 88 x 140 mm can be personalised within a maximum printable area of 54,0 x 86,0 mm and with three selectable printing positions on the card. In addition, by turning the card manually even a double print can be applied. Furthermore, inline encoding of a contactless chip is possible.

The ECP-XL accepts card sizes of 124x88mm and 140x88mm with a maximum print area of 86x54mm

The ECP-XT event card printer is based on an established colour sublimation card printer and can print extra-long cards, such as ID cards for major events. Partially preprinted cards with a width of 54 mm and a maximum length of 140 mm can be personalised on a printing area of 54 x 86 mm, single sided. The PD display, the plug & play driver and an easy field-changeable printhead ensures maximum convenience. As well as printing at low sound levels, one of the ECP-XT Printers outstanding strengths is its fast printing speed; Up to 180 full colour cards per hour and 1,400 monochrome (K-Resin black) printed cards per hour. In addition the ECP-XT comes with an option of an embedded encoding kit for either RFID transponders, smart cards or magstripes. When it comes to the printing costs, it's one of the cheapest of its class. The ECP-XT event card printer is the ideal solution for the professional design and creation of extra-long passes/tickets and vouchers for major sport or music events.

The ECP-XT accepts card sizes up to 140mm with a maximum print area of 86x54mm
