Lightweight and Ergonomic

Echelon's low-profile curves were designed to sit comfortably in your hand over long periods of use, then slipping neatly into your pocket or bag for transport to your next meeting.

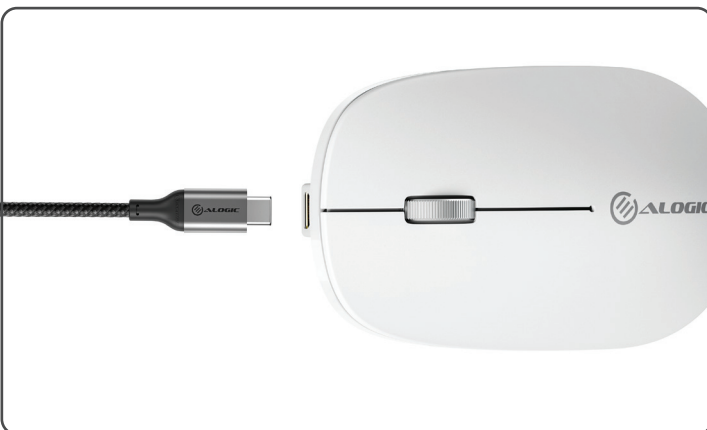

Modern and Minimalist

With a clean, understated design, the Echelon Wireless Mouse looks great on any desk, with a whisper-quiet click that won't annoy your co-workers.

Switch Devices With a Single Click

Echelon makes multitasking easy, with a button to quickly switch between two paired Bluetooth devices (such as your MacBook and iPhone) and one connected with its 2.4Ghz USB-A dongle.

No Batteries Needed

Thanks to our innovative USB-C Port placement, Echelon can even be used while it's recharging.
