

REVLAR synthetic paper is washable and cleanable

DURABLE

WATERPROOF

FADE RESISTANT

WASHABLE

REPELS GREASE

TEAR-PROOF

HIGH / LOW TEMPS

With its waterproof and durable characteristics, REVLAR is well suited for signage, manuals, door hangers, tags or labels. It is so durable that even complete and lengthy submersion in liquid has no effect. Because of this tolerance for water, it's easy to clean!

Ways to clean REVLAR:

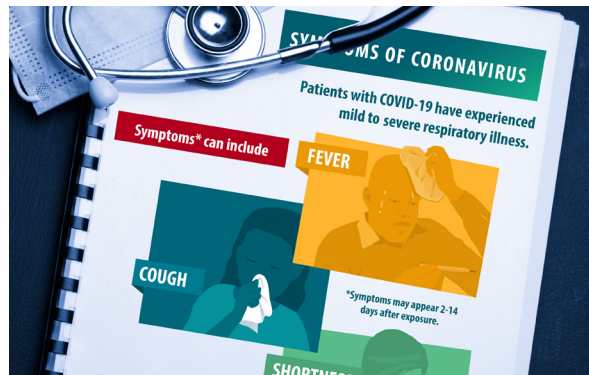

- Submerge it in water
- Run it under the tap
- Wipe it down with a wet cloth
- Spray it and wipe it

What kind of cleansers can be used to sanitize it?

- Standard soap
- Mild cleansers
- Chlorine-based solutions (like bleach)
- Hydrogen peroxide

Wipe clean healthcare manual

Tips to combat stubborn stains:

- Immerse the material in a 50/50 mix of warm water and bleach
- In our tests, most stains disappeared within 10 minutes, but you can soak for up to 2 hours with no adverse effect to the toner
- Once removed from the bleach solution, the material should be rinsed thoroughly with water and dried with a non-abrasive cloth

With repeated washings, the REVLAR material itself will not break down because it is plastic. Toner flaking is the primary risk with washing, but practicing proper care and using the correct cleansers will make all the difference.

Tips to extend toner life:

- Don't stack wet sheets - let REVLAR dry completely before stacking
- Only use the recommended cleansers - don't use alcohol or solvent-based cleansers
- Never scrub toner with a brillo pad
- Consider UV coating your REVLAR for the fullest protection

What about lamination?

Lamination can peel, bubble or crack, which allows moisture to penetrate and damage the finished piece.

REVLAR is better than lamination:

- REVLAR is longer lasting
- Cleaning is easier and liquids cannot seep into the edges
- Less time-consuming and less expensive
