ALLEVIATES INFLAMMATION, HELPS ELIMINATE COMEDONES AND SMOOTHS OUT THE SKIN

INDICATIONS

LOCAL
INFLAMMATION

LARGE PORES

COMEDONES AND
IMPURITIES

UNEVEN SKIN TONE

OILY AND
COMBINATION
SKIN

LACK OF GLOW

PRODUCTS

**VENOME MESO
ANTIOX**

**VENOME MESO
ACNE**

**VENOME PEEL
MANDELIC GLOW**

The **Mandelic Glow** peel is an all-year-round product, which perfectly preps the skin before next steps of the treatment. It contains 40% mandelic acid, which regulates sebum secretion, reduces keratosis pilaris, minimizes large pores, and demonstrates anti-bacterial properties, which is why it is recommended for problematic skins.

Venome Mandelic Glow stimulates the production of ceramides, glycosaminoglycans, as well as collagen and elastin fibers, thus increasing the level of hydration and strengthening the skin's natural barrier. As a result, the skin becomes firmer, and the appearance of superficial wrinkles is reduced.

The second step of the treatment involves the application of **Venome Meso Acne** and **Venome Meso Antiox**. This unique combination contains extracts from two mushrooms (cordyceps and turkey tail), as well as antioxidants and amino acids — a perfect therapy that helps fight recurring skin inflammation and comedones. The ingredients work in an optimum way, demonstrating strong anti-inflammatory and anti-bacterial action. They restore skin's resistance, as they boost anti-oxidation processes.

HOW TO PERFORM THE TREATMENT

STEP I. REDUCE INFLAMMATION AND SMOOTH OUT THE SKIN WITH AN ALL-YEAR-ROUND PEEL

1. **REMOVE** ALL MAKE-UP AND ANY RESIDUAL OIL IN THE TREATMENT AREA.
2. **COLLECT THE PRODUCT** USING A COLLECTION NEEDLE AND A SYRINGE. THE AMOUNT OF THE PRODUCT DEPENDS ON THE AREA: FACE (3 ML), NECK (2 ML), DÉCOLLETAGE (2 ML), OR HANDS (2 ML).
3. **APPLY THE PRODUCT** WITH YOUR GLOVED HANDS AND CAREFULLY MASSAGE INTO THE SKIN.

venome®

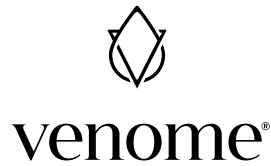

4. **LEAVE THE PRODUCT** ON THE SKIN FOR 6–15 MINUTES. HOW LONG THE PRODUCT SHOULD BE LEFT ON THE SKIN DEPENDS ON INDIVIDUAL INDICATIONS AND THE SKIN CONDITION. IN THOSE AREAS WHERE STRONGER ACTION IS REQUIRED, APPLY A SECOND LAYER OF THE PEEL.
 - **6–8 MINUTES** – SENSITIVE, COUPEROSE, IRRITATION-PRONE SKIN
 - **8–10 MINUTES** – NORMAL SKIN, VISIBLE AGING SIGNS
 - **10–12 MINUTES** – SKIN PRONE TO INFLAMMATION AND COMEDONES
 - **12–15 MINUTES** – THICK, OILY SKIN, EXCESSIVE SEBUM SECRETION, DISCOLORATIONS AND HYPERPIGMENTATION
5. **RINSE THE PRODUCT OFF** WITH COOL WATER. IF THE PATIENT EXPERIENCES STRONG BURNING SENSATION OR INTENSE REDNESS IS OBSERVED, IMMEDIATELY RINSE THE TREATED AREA TO REMOVE THE ACID.

STEP II. REDUCE DISCOLORATIONS AND HYPERPIGMENTATION

1. **USE A COLLECTION NEEDLE** TO COLLECT 3 ML OF VENOME MESO ACNE AND 1 ML OF VENOME MESO ANTIOX
2. **DISINFECT** THE TREATMENT AREA
3. **PERFORM** MESOTHERAPY
4. **DISINFECT** THE TREATMENT AREA

POST-TREATMENT CARE

AFTER THE TREATMENT, APPLY THE VENOME SKIN ANTIDOTE GLOW AMPOULE AND VENOME REGENERATING CREAM TO BOOST THE MOISTURIZING AND REGENERATING EFFECT.

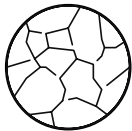

REDUCES DISCOLORATIONS AND RESTORES GLOW

WITH VISIBLE DRY
PATCHES

LACK OF ELASTICITY

PRODUCTS

**VENOME MESO
ANTIOX**

**VENOME MESO
DELICATE WHITE**

**VENOME PEEL
LACTIC HYDRATION**

A unique **combination of an all-year-round peel and mesotherapy** is an effective tool for eliminating **discolorations and hyperpigmentation**.

The first step involves the application of the **Venome Lactic Hydration** peel. The product helps increase skin hydration and strengthens the skin's natural barrier, which leads to an increased amount of ceramides. The result? **Stronger lipid barrier** and more **hydrated skin**. A unique combination of lactic acid, three amino acids, allantoin, and ascorbic acid stimulates skin cells, thus improving skin quality and the structure of its outermost layers.

The second step involves mesotherapy with the use of **Venome Delicate White** and **Antiox**. Antioxidants and resorcinol contained in the products effectively **reduce dark spots and hyperpigmentation**, softening the skin and restoring its healthy glow.

4. **LEAVE THE PRODUCT ON THE SKIN FOR 6–15 MINUTES.** HOW LONG THE PRODUCT SHOULD BE LEFT ON THE SKIN DEPENDS ON INDIVIDUAL INDICATIONS AND THE SKIN CONDITION. IN THOSE AREAS WHERE STRONGER ACTION IS REQUIRED, APPLY A SECOND LAYER OF THE PEEL.
 - **6–8 MINUTES** – SENSITIVE, COUPEROSE, IRRITATION-PRONE SKIN
 - **8–10 MINUTES** – NORMAL SKIN, VISIBLE AGING SIGNS
 - **10–12 MINUTES** – SKIN PRONE TO INFLAMMATION AND COMEDONES
 - **12–15 MINUTES** – THICK, OILY SKIN, EXCESSIVE SEBUM SECRETION, DISCOLORATIONS AND HYPERPIGMENTATION
5. **RINSE THE PRODUCT OFF** WITH COOL WATER. IF THE PATIENT EXPERIENCES STRONG BURNING SENSATION OR INTENSE REDNESS IS OBSERVED, IMMEDIATELY RINSE THE TREATED AREA TO REMOVE THE ACID.

STEP II. REDUCE DISCOLORATIONS AND HYPERPIGMENTATION

1. **USE A COLLECTION NEEDLE** TO COLLECT 3 ML OF VENOME MESO DELICATE WHITE AND 1 ML OF VENOME MESO ANTIOX
2. **DISINFECT** THE TREATMENT AREA
3. **PERFORM** MESOTHERAPY
4. **DISINFECT** THE TREATMENT AREA

POST-TREATMENT CARE

AFTER THE TREATMENT, APPLY THE VENOME SKIN ANTIDOTE HYDRATION AMPOULE AND VENOME REGENERATING CREAM TO BOOST THE MOISTURIZING AND REGENERATING EFFECT.

venome®

FACE AND PERIORBITAL REVITALIZATION

INDICATIONS

LACK OF ELASTICITY AND FIRMNESS IN THE FACE, NECK AND DÉCOLLETAGE

VISIBLE CHANGES IN SKIN STRUCTURE

FLACCIDITY IN THE PERIORBITAL AREA

VISIBLE DEHYDRATION

DARK CIRCLES

EDEMA

PRODUCTS

VENOME AMBER HYDRO 0,55%

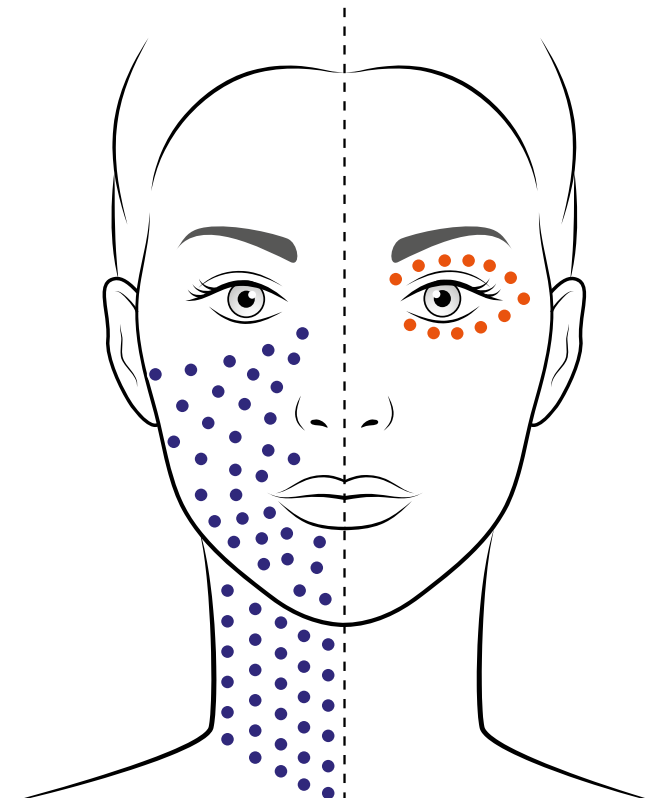

VENOME STIMULATE COLLAGEN

A unique combination of **Venome Stimulate Collagen** (for face revitalization) and **Venome Amber Hydro** (for nourishing the periorbital area) provides the cells with all the required nutrients, additionally stimulating fibroblasts to produce collagen and elastin. The series of treatments allows the skin to recover its firmness, density, and the right level of hydration.

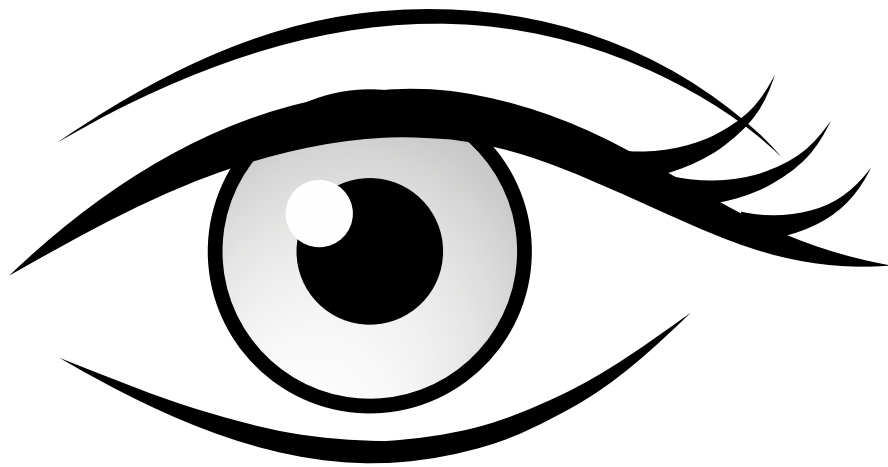

VENOME STIMULATE COLLAGEN

VENOME AMBER HYDRO 0,55%

HOW TO PERFORM THE TREATMENT

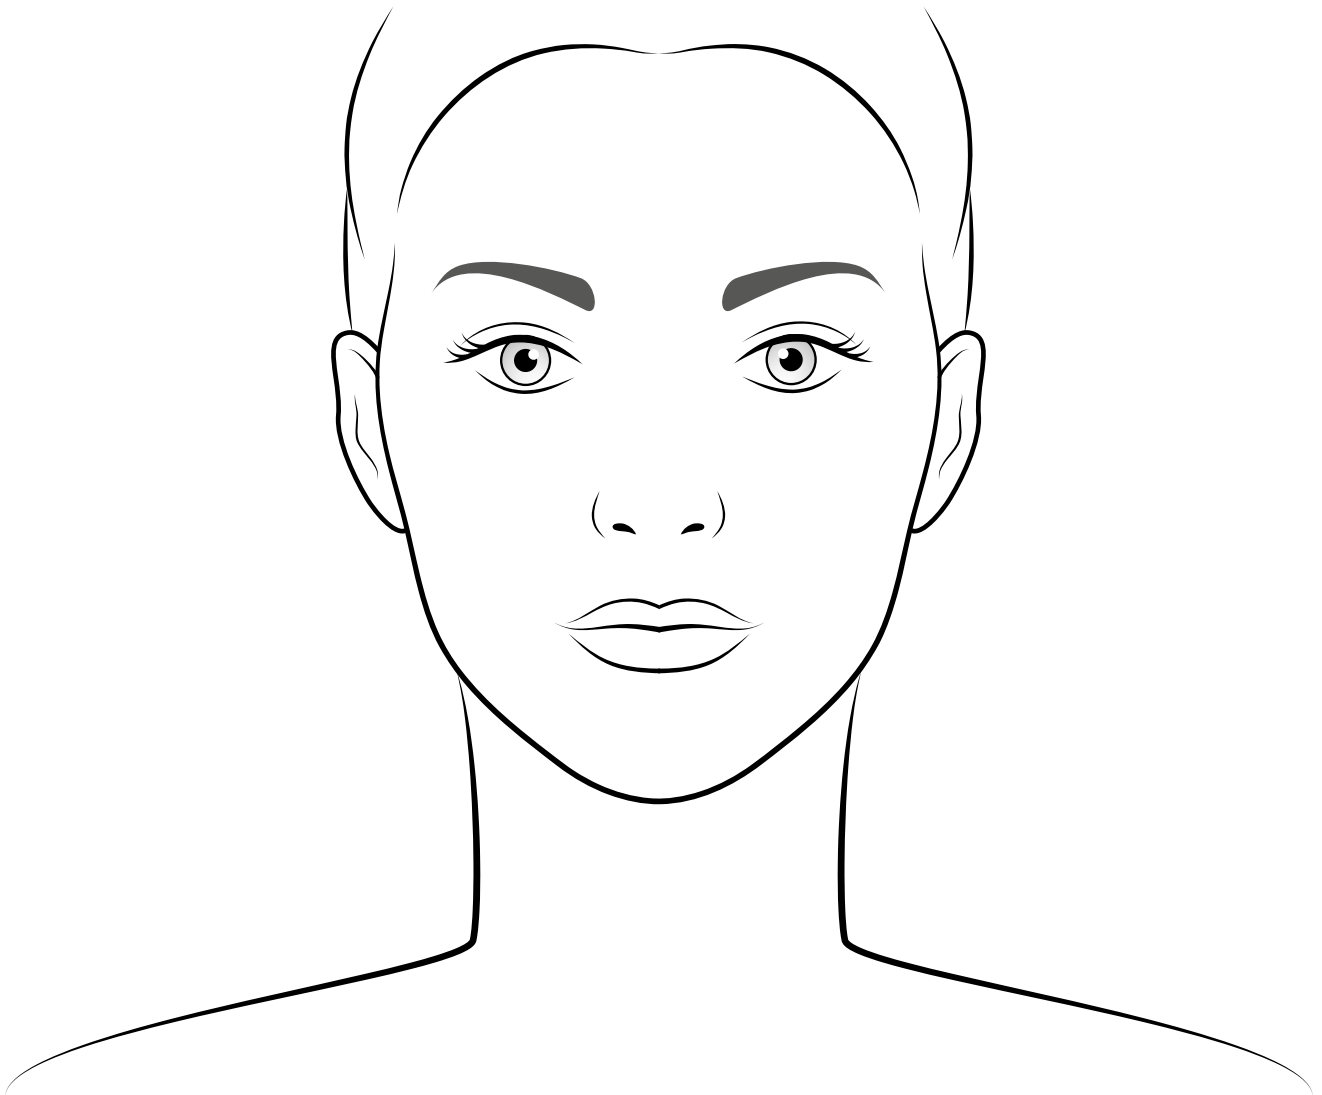

PERIORBITAL REVITALIZATION

1. **REMOVE MAKE-UP** AND ANY RESIDUAL OIL
2. **COLLECT THE PRODUCT WITH THE COLLECTION NEEDLE:**
1-2 ML OF VENOME AMBER HYDRO. WE NEED AROUND
0.5-0.7 ML FOR EACH SIDE OF THE EYE FOR TEAR TROUGH
AREA OR 1 ML FOR TEAR TROUGH AND UPPER EYELID
3. **DISINFECT THE TREATMENT AREA**
4. **PERFORM MESOTHERAPY**
5. **DISINFECT THE TREATMENT AREA**

HOW TO PERFORM THE TREATMENT

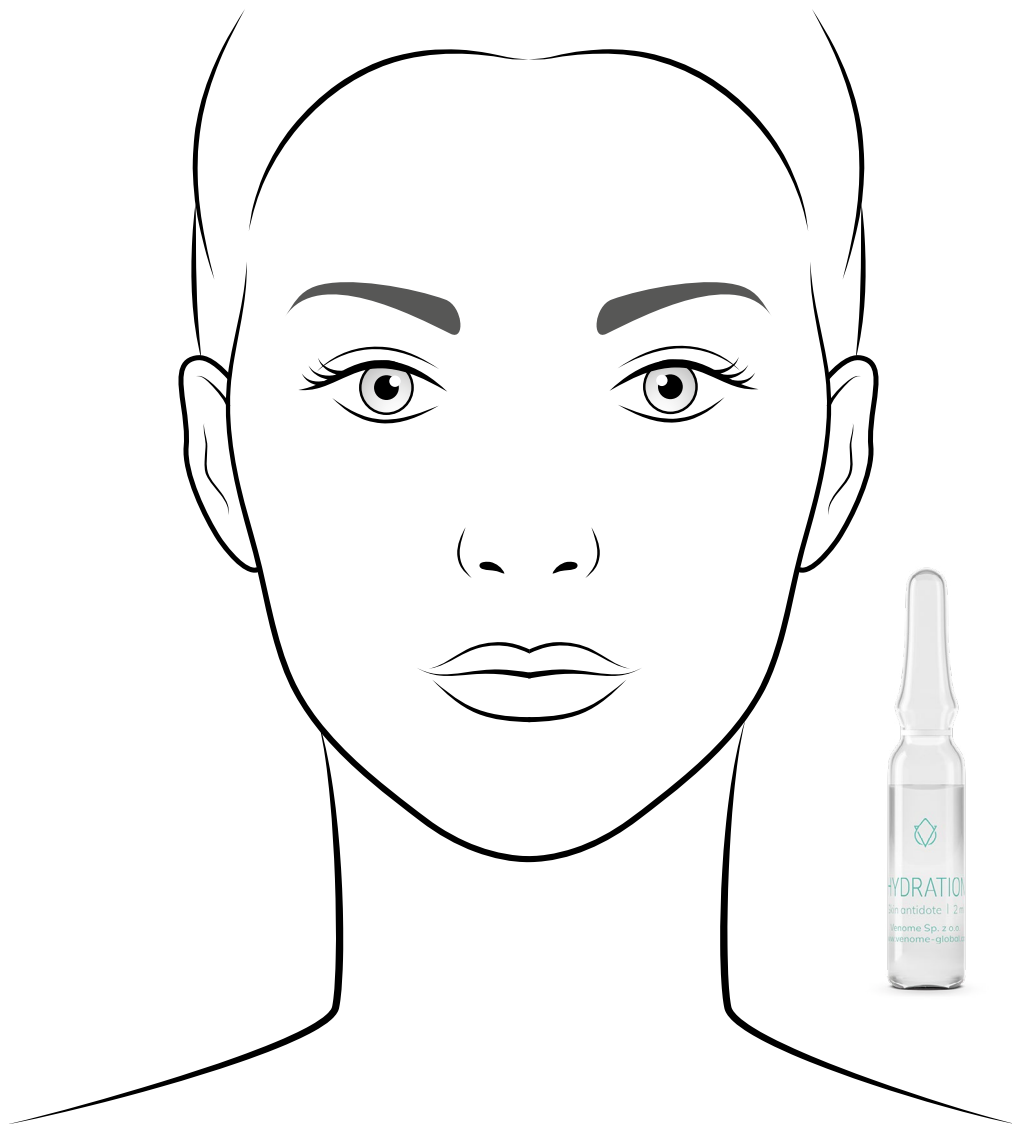

FACE, NECK, AND DECOLLETAGE

- 1. REMOVE MAKE-UP AND ANY RESIDUAL OIL**
- 2. COLLECT THE VENOME PRODUCT WITH THE COLLECTION NEEDLE: 3 ML OF STIMULATE COLLAGEN** FOR FACE MESOTHERAPY OR 5 ML FOR FACE, NECK, AND DÉCOLLETAGE MESOTHERAPY
- 3. DISINFECT THE TREATMENT AREA**
- 4. PERFORM MESOTHERAPY**
- 5. DISINFECT THE TREATMENT AREA**

POST-TREATMENT CARE

1. **AFTER THE TREATMENT,** APPLY THE VENOME REGENERATING CREAM
2. **TO ELIMINATE REDNESS AND REDUCE ANY BRUISING,** USE THE VENOME SKIN ANTIDOTE HYDRATION PRODUCT WITH AMINO ACIDS AND ARNICA MONTANA EXTRACT

venome®

SKIN RENEWAL WITH RETINOL

INDICATIONS

SKIN
INFLAMMATION

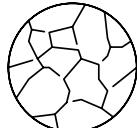

LOOSE SKIN

WRINKLES

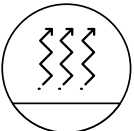

DARK SPOTS

DULL AND
GRAY SKIN

LACK OF GLOW

LACK OF HYDRATION

PRODUCTS

RETINOL C SHOT

With its regenerating and rejuvenating properties, the **Retinol C Shot** exfoliating treatment restores skin firmness, minimizes the appearance of wrinkles, and eliminates local discolorations. The treatment involves the application of two products: the **VITAMIN C SHOT** serum ampoule and the **RETINOL SHOT** mask.

Each ampoule of the **VITAMIN C SHOT** serum contains a unique combination of **antioxidants** and **natural plant extracts** that effectively inhibit the oxidation processes directly causing the skin to age faster. Ascorbic acid in a high, **15% concentration** minimizes the amount of free radicals, which are responsible for damaging lipids and proteins, including collagen and elastin fibers, and thus cause faster cell death and progressive skin aging. The product also contains marigold extract — a rich source of flavonoids and carotenoids with antioxidative and antibacterial properties, which promotes the skin healing process. Acerola extract is a source of vitamin C and beta-carotene. It intensifies the anti-radical properties of the product.

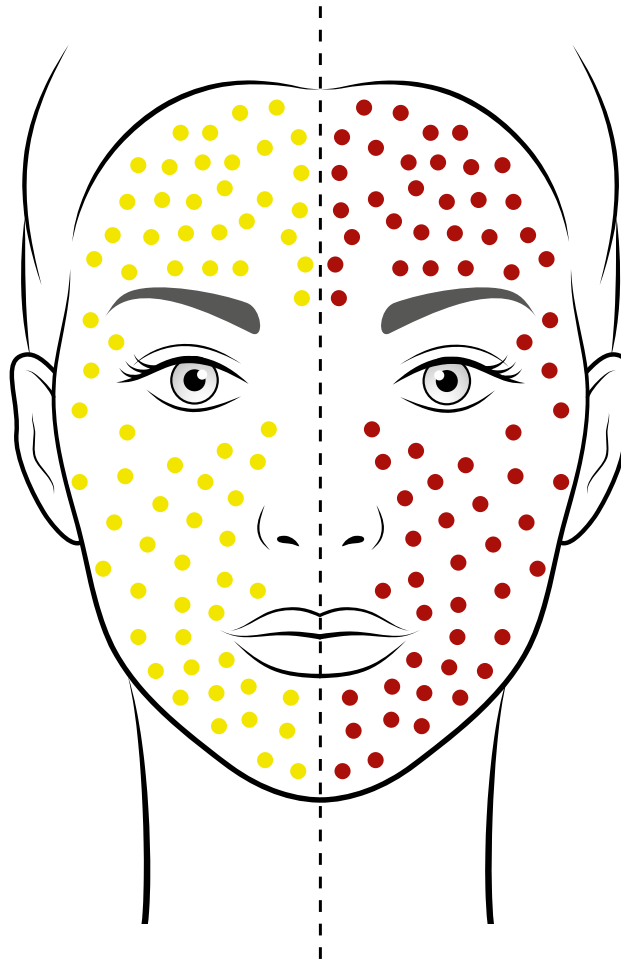

The **RETINOL SHOT** mask contains exfoliating retinol. It stimulates a number of skin renewal processes, thus improving its density and elasticity, reducing discolorations, and minimizing the appearance of persistent wrinkles. Retinol is a basic form of vitamin A that belongs to a group of compounds called retinoids. Once applied on the skin, it undergoes a number of transformations: first into retinal and, in the final stage, into retinoic acid. After binding with specific receptors in tissues, it activates a cascade of restorative reactions. In the first stage, retinol accelerates the cell renewal process and enables quicker removal of dead structures (corneocytes), which helps improve skin tone and reduce superficial blemishes.

venome®

● VITAMIN C SHOT

● RETINOL SHOT

HOW TO PERFORM THE TREATMENT

- 1. PREP THE SKIN** OF THE FACE, NECK, AND DÉCOLLETAGE BY COMPLETELY REMOVING MAKE UP AND DRYING THE SKIN.
- 2. OPEN THE GLASS VIAL** WITH THE VITAMIN C SHOT SERUM AND APPLY THE CONTENTS TO THE TREATMENT AREA. GENTLY PAT THE PRODUCT WITH YOUR FINGERTIPS UNTIL IT COMPLETELY ABSORBS.
- 3. ONCE THE SERUM IS ABSORBED, APPLY THE CONTENTS OF THE RETINOL SHOT SACHET** TO THE ENTIRE TREATMENT AREA. EVENLY DISTRIBUTE THE RETINOL SHOT MASK IN A THIN LAYER, LEAVE IT ON THE SKIN **FOR 4-8 HOURS**, AND RINSE WITH LUKEWARM WATER. BE CAREFUL TO AVOID THE PERIORBITAL AREA AND MUCOUS MEMBRANES WHEN APPLYING AND REMOVING THE PRODUCT. THE OPTIMAL TIME TO LEAVE THE MASK ON THE SKIN DEPENDS ON THE CONDITION, THICKNESS, AND TYPE OF SKIN, AND IS DETERMINED BY THE PROFESSIONAL PERFORMING THE TREATMENT.

POST-TREATMENT CARE

DURING THE COURSE OF THE TREATMENT AND 4 WEEKS AFTER COMPLETING IT, SPF 50+ SUNSCREEN MUST BE USED DURING THE DAY TO PROTECT THE SKIN AGAINST SUN DAMAGE.

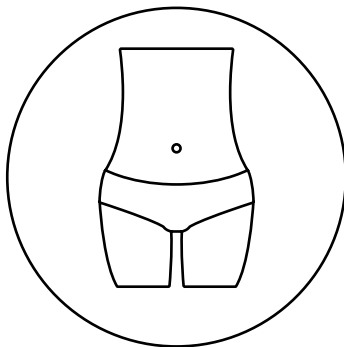

AFTER THE TREATMENT, DO NOT PULL ON THE PEELING SKIN, AS THIS INTERRUPTS THE SKIN'S NATURAL HEALING CYCLE.

venome®

REDUCING EXCESSIVE ADIPOSE TISSUE

INDICATIONS

LOCAL FAT DEPOSITS IN THE
THIGH AND STOMACH AREA

PRODUCT

VENOME LIPO SLIM

Phosphatidylcholine and **deoxycholic acid** in high concentrations work synergistically as one of the most effective lipolytic treatments used for combating stubborn excessive fat deposits.

Phosphatidylcholine is a phospholipid naturally found in the human body. When applied directly into the adipose tissue, it activates receptors responsible for glucose and lipid metabolism to break down lipids into smaller particles, which are then transported to the liver and ultimately removed from the body.

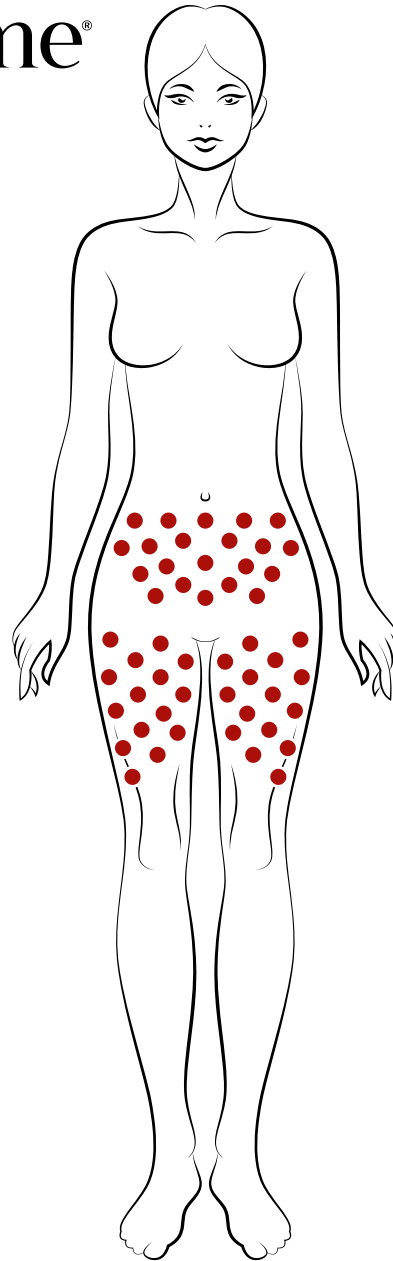

Deoxycholic acid, also known as cholanoic acid, breaks down cell membranes in adipocytes, thus eliminating fat deposits. The combination of these two ingredients is one of the best tools for targeted body contouring.

venome®

● **VENOME LIPO SLIM**

HOW TO PERFORM THE TREATMENT

USE A **COLLECTION NEEDLE** TO COLLECT **VENOME LIPO SLIM** IN THE MAXIMUM AMOUNT OF **15 ML** PER ONE TREATMENT AREA. DISINFECT THE TREATMENT AREA.

1. **PERFORM** MESOTHERAPY
2. **DISINFECT** THE TREATMENT AREA

POST-TREATMENT CARE

AFTER THE TREATMENT, THE PATIENT SHOULD AVOID INTENSE PHYSICAL ACTIVITY AND DRINK A LOT OF WATER.
