Afrikana

Exciting early mornings spent in the back of a safari gypsy chasing wild calls with the help of a tracker. Cozy nights tucked away warmly in lodges surrounded by miles and miles of forest land.

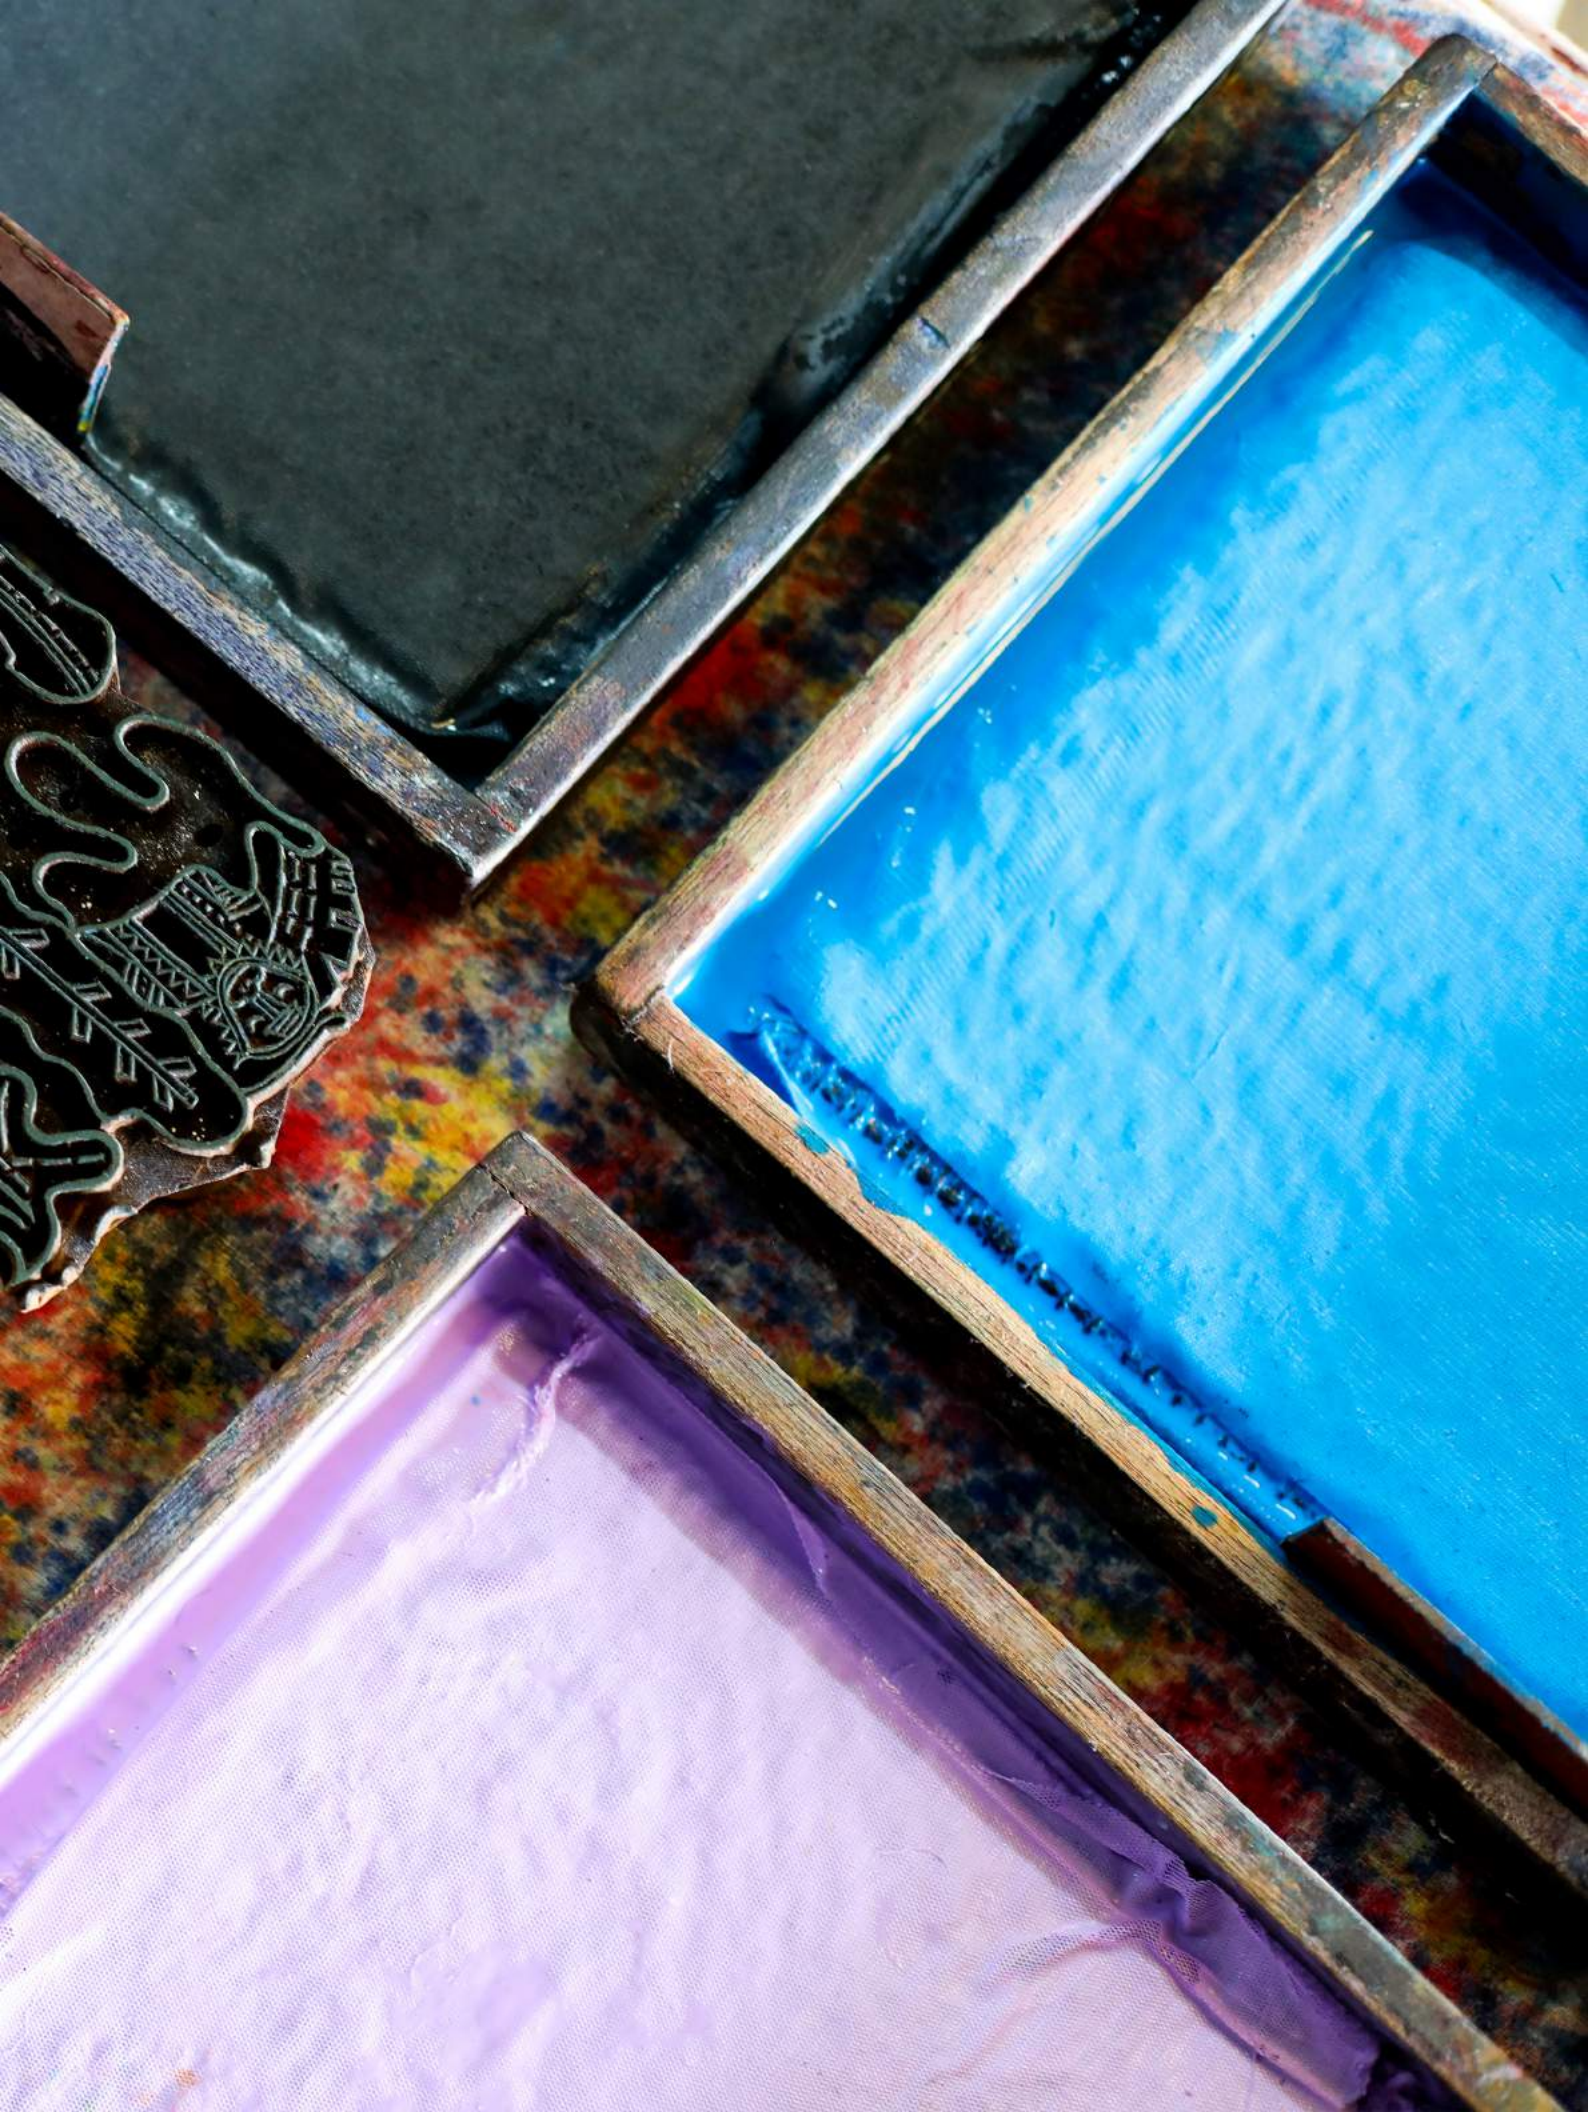

Derived from the word Africa, our new collection **AFRIKANA** features **hand blocked prints** of forests densely populated with monkeys & wild flowers. Deep warm hues fill the palate with a dash of signature motifs and print details found all around the continent.

Each season we are inspired by a corner of the world. This time round we looked at one the most ancient lands - one that boasts the worlds largest wild animal populations in terms of density and diversity. And we let our imagination run a little wild!

Come along on a safari of prints with us! All hand block printed in Jaipur, India.
