by SCHIER

GARBAGE DISPOSAL ALTERNATIVE

SINK DIFFERENTLY™

The revolutionary kitchen sink-waste filter and garbage disposal alternative, keeping grease and food waste out of your drain.

Made in the USA 

actual size

IMPROVED SEWER HEALTH BENEFITS EVERYONE

As food and grease from homes and apartments move downstream they stick to sewer pipes and eventually lead to clogging and sewage overflows. There are over 50,000 sewer overflows in the U.S. each year and nearly half of them are caused by the buildup of grease. As our population grows, our city sewer systems can't keep pace. Sprout is a proactive solution that keeps residential food and grease out of the sewer, allowing city maintenance to reverse the damage. Over time, Sprout saves taxpayer dollars and enhances communal water hygiene.

ENCOURAGING BETTER KITCHEN HABITS

It is increasingly rare to find garbage disposals in commercial kitchens — and for good reason. The pros know that treating their sink like a trashcan leads to clogs and maintenance. And besides, garbage disposals are noisy and can be dangerous.

Bring commercial kitchen practices to your home with Sprout.

Scrape plate into trash

Wipe excess grease into trash

Rinse plate in sink

SILENT IS THE NEW SOPHISTICATION

Sprout quietly removes 90% of food and grease from the residential wastewater stream.

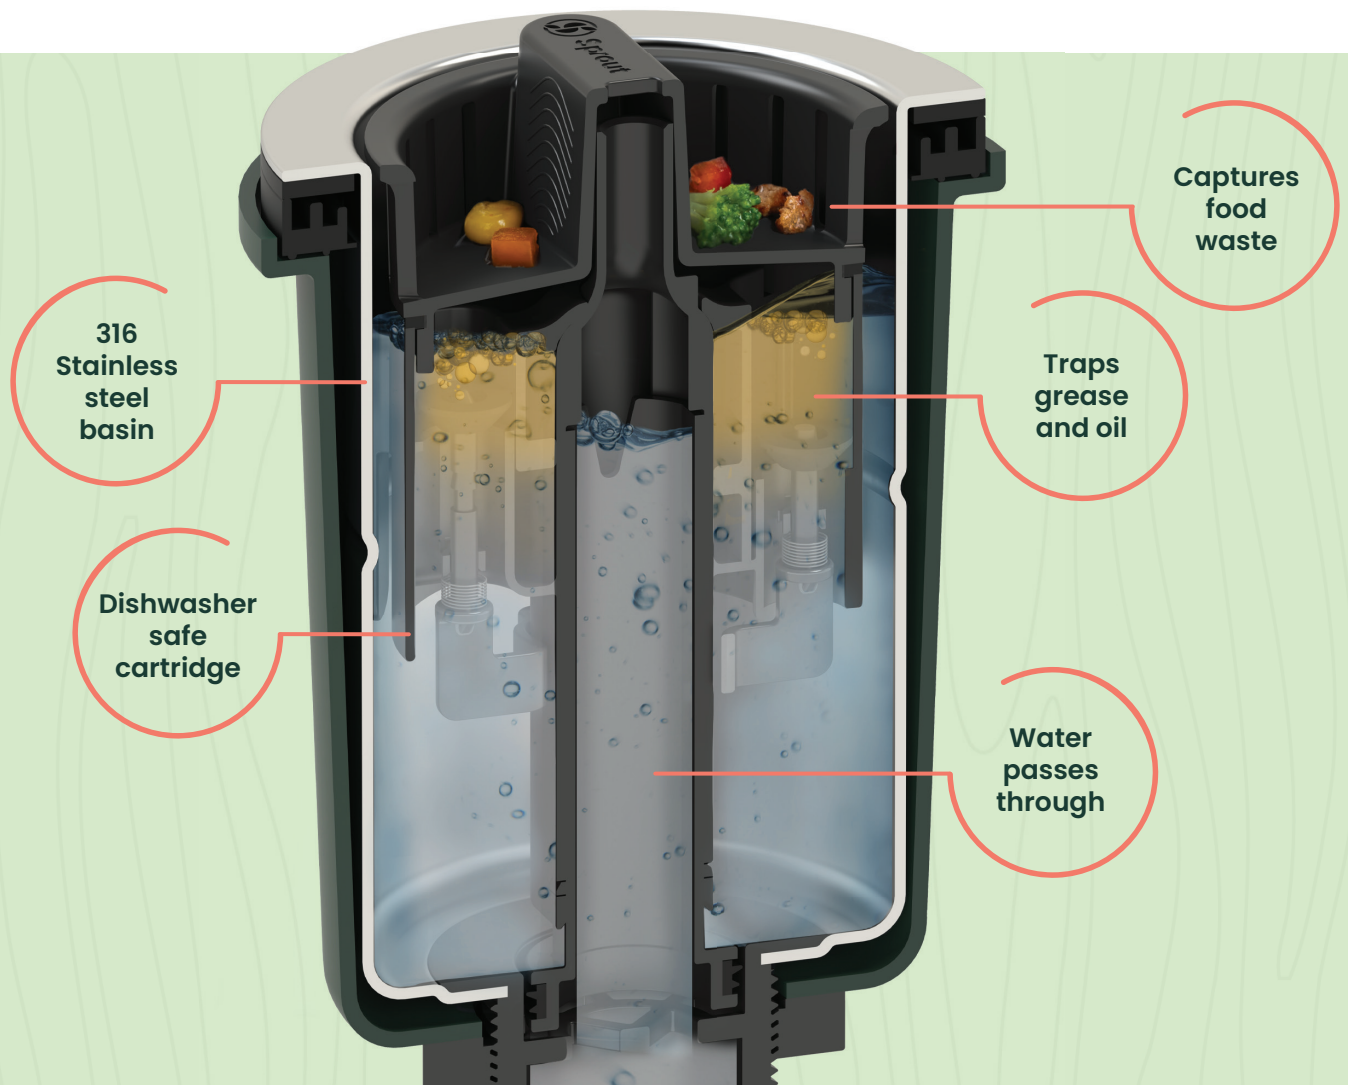

REMOVAL

Lift the grab tab to dispose of food that accumulates in the sink basket, as well as any grease that has been trapped.

DISPOSAL

Dispose of leftover food and grease in the compost or trash.

Compost compatible

Dishwasher safe

Silent

No electricity

No blades

Compact size
