solutions®

THE CHALLENGE

Markon Solutions, Inc. is a targeted management consulting agency founded in 2007. Supporting clients around a core variety of verticals in finance, M&A, facilities, security and training, Markon has recently completed a 2-year office renovation. Although the remodel went well, after completion they failed their WELL certification due to insufficient circadian lighting. To achieve their goal to be the first WELL certified business in Virginia, Markon needed to find a solution to upgrade their lighting, and re-appeal to the WELL inspector team.

THE INSTALLATION

After touring several successful human-centric lighting installations by Lighting Science with partner, Anthrospheres, Markon made the decision to select Lighting Sciences' HealthE™ lighting solutions to achieve circadian lighting goals and WELL certification. The overall project had a total square footage of approximately 1905 sq. ft, with over 600 sq. ft. representing the lighting component. Over 50% of the lighting project was switched out to Lighting Science solutions. Markon selected the GoodDay® 2'x2' and 2'x4' Troffers for their common office areas. Additionally, employees in low-daylight work areas were given Genesis DynaSpectrum™ luminaires for their desks and GoodDay® lamps (BR/A19) for their task lights.

THE FINDINGS:

Markon Solutions had completed a 2-year renovation netting a failed WELL Certification. After selecting Lighting Science lighting solutions, and replacing

approximately 50% of their total lighting, they **more than 100%** surpassed WELL certification standards and passed their WELL inspection. They achieved their goal and became the 1st WELL certified business in the State of Virginia. Employee satisfaction with their space and lighting could not be higher. Lighting Science GoodDay® solutions are proven to be an excellent choice for commercial installations to help employees feel and perform better. The lighting properties help to fulfill the lighting requirements of the WELL building standard.

“GREAT NEWS! MARKON IS THE FIRST WELL CERTIFIED SPACE IN VIRGINIA (29TH IN US, 48TH IN WORLD, 36TH OFFICE INTERIOR)! I CANNOT THANK YOU ENOUGH FOR ALL OF THE GREAT GUIDANCE YOU PROVIDED. YOUR LAMPS, THE GENESIS DYNASPECTRUM™ AND UP-LIGHTS CRUSHED THE REQUIREMENTS BASED ON THE TESTING!”

– Raymond Carney, VP Operations & Private Sector

Products Installed

GoodDay® Troffers: Recessed troffer luminaire with engineered spectrum to enhance mood, mental focus, and to boost energy and performance. High quality white light that supports the natural wake-sleep cycle and general wellbeing, similar to morning sunlight.
