

Dimensions of main elements of miniB

p 1/3

The bag full of 28kg goods

1. The standard bag designed for miniB includes all elements in, still leaving some space for sleeping bags, inflatable pillows or cooking essentials.

* if in your airline, there is weight restriction up to 20kg (ex. Ryanair) not 32kg (ex. Wizzair) - don't worry - we have solution.

As option you can order second, smaller bag which fits perfectly miniB's table, stools, legs and belts - in result you are under 20kg with main bag while in second one (which is expandable by one zip) except of mentioned elements you may transport all other of your travel gear.

In that case you are simply transporting two 20kg comfortable baggages.
