

Homecare Manager

Manage your homecare patient portfolio &
prescriptions

What is Homecare Manager?

With Homecare Manager you can readily view and manage your homecare service to streamline and improve your capacity and workflow.

The 4 P's of Homecare Manager

With Homecare Manager you can manage information on your:

Prescription

Provider

Product

Patients

These four p's are linked within the system, meaning you can view which patient has received which prescription and what specific product from which provider.

HEMOCARE MANAGER'S FEATURES

1

PAS

2

JAC

**Designed around
SLA's**

Easy and secure to use

Homecare Manager is designed around your SLA's so you can be sure you are providing a quality and timely service whilst ensuring your staff are working efficiently and effectively.

The system has comprehensive reporting tools that give you regular insight into the running of the service.

Homecare Manager retains a full audit trail of all activities and fully supports SLA monitoring.

Easily locate your prescriptions

Nurses and consultants can see **prescription status information** as soon as you set it so there is no need for repeated calls from the clinic to check on prescriptions.

Labelling and scanning technology means that you will always know where prescriptions are. If you use slots, you can accurately locate any prescription.

The system enables you to accurately **manage workloads** by pre-planning regular prescriptions you can control what the workload looks like for any given day.

The solution can be configured to fit your current business processes or amended to suit a best-practice approach.

From arrival to destination

- Step 1** Book in your prescriptions
- Step 2** Print your label and place it on the specific prescription
- Step 3** Track prescriptions as they are scanned with wireless scanners throughout their journey

Compliance with dm+d

The Dictionary of medicines and devices (dm+d) is the recognised NHS standard for communicating medicines information.

Our CD Ordering platform adheres to the standards set out in the dm+d.

As NHS organisations make use of this dictionary on different systems, the CD Ordering system will be intuitive for your staff.

Our other digital solutions

Temp Tracker

Monitors medical fridge temperature, helping you comply to CQC requirements

Quality Portal

Quality Portal is a patient safety reporting tool allowing you to manage and improve quality in your healthcare organisation

Digital Library

Digital library provides a full document management solution enabling staff across any organisation to access all the documents/operational policies

Contract Tracker

A key tool to support contract monitoring and performance and ascertain value for money
