# HAIR ARTIST,

You are a part of life's most important moments, both in everyday life and in celebrations. You are an artist and hair is your medium. In your hands, even the wildest hair dreams become true. Your job is to make others shine. To make them feel stunningly beautiful.

This is for you:

## Thank you.

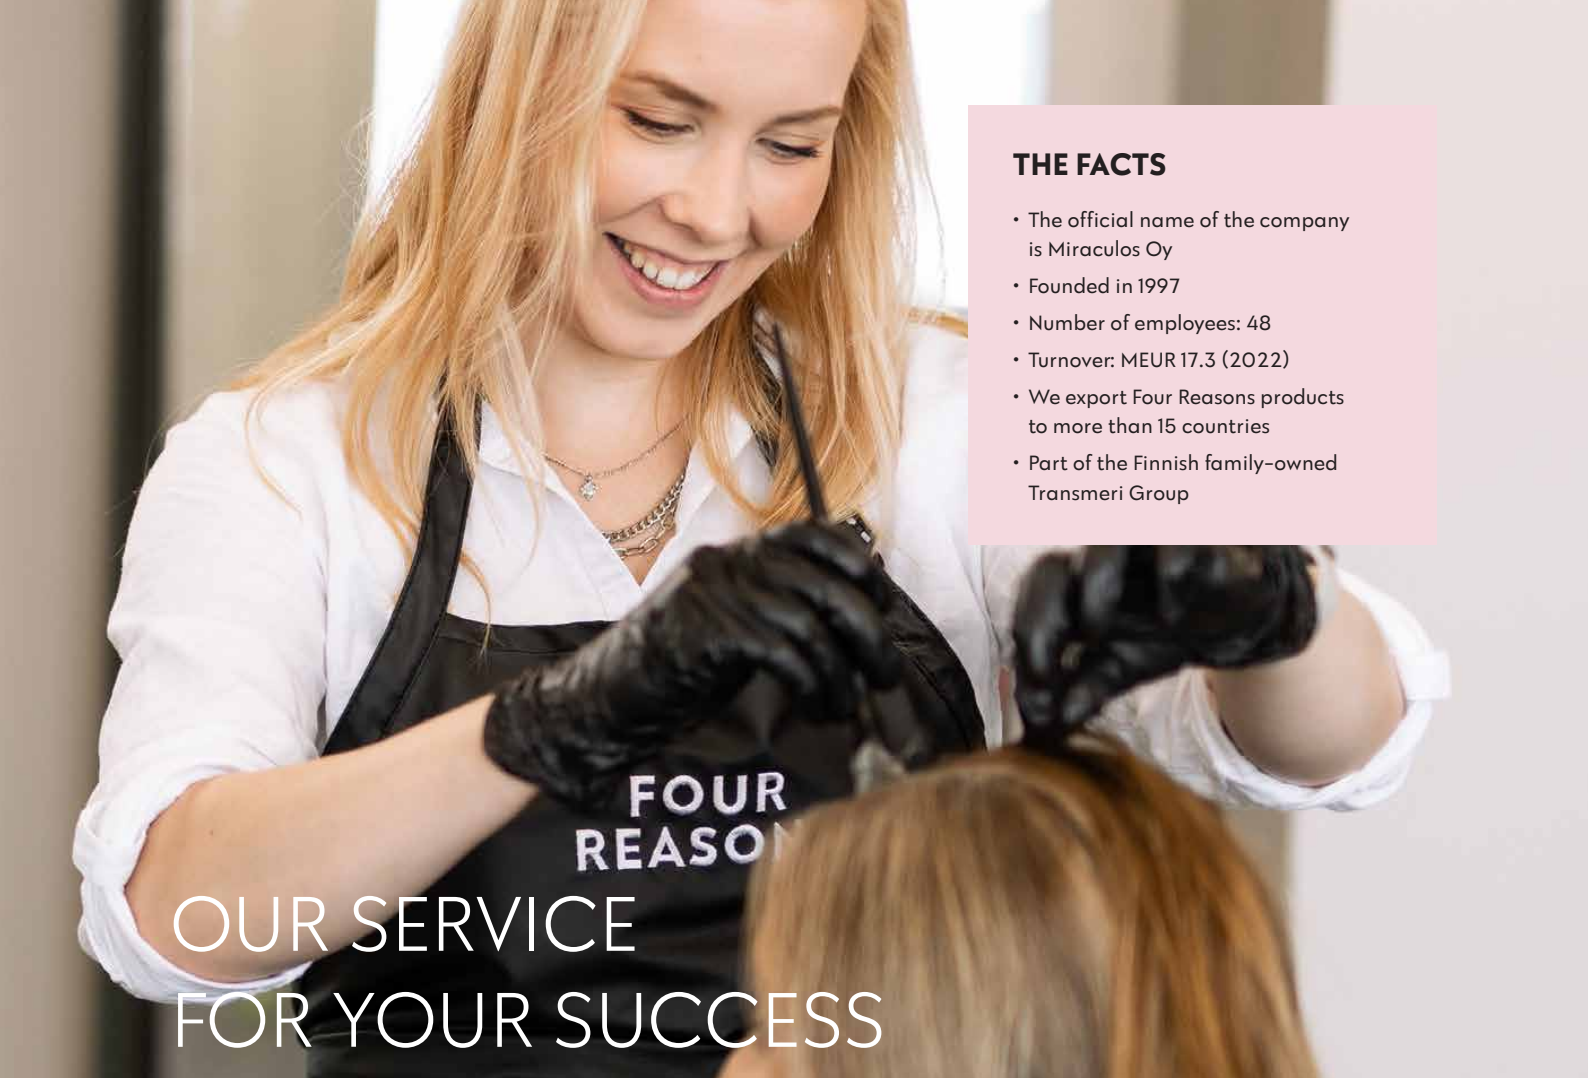

At Four Reasons, we can't imagine a greater honor than to be part of those moments. To contribute to those magical encounters, even just a hair's breadth. To support you, just as you support your own clients.

We want to offer more than just tools you can rely on. We want to create products and services that inspire you and help you do your best time after time. We want to be a community you can lean on when things get tough. We want to offer education that pushes you forward and encourages you to be bold and innovative.

Four Reasons is a community of passionate hair stylists whose mission is to make everyone feel gorgeous as themselves. 100% vegan, sustainably produced professional hair products, made with love for people's individual beauty.

**Four Reasons**

*We Love the Real You*

## THE FACTS

- The official name of the company is Miraculos Oy
- Founded in 1997
- Number of employees: 48
- Turnover: MEUR 17.3 (2022)
- We export Four Reasons products to more than 15 countries
- Part of the Finnish family-owned Transmeri Group

# OUR SERVICE FOR YOUR SUCCESS

Here are at least four reasons to choose Four Reasons as your partner. There are many more reasons, and we would be happy to have a chat with you about them.

### #1 Supporting your success

We want to help the hair salons to flourish! We offer you all the products you'll need in your salon work, training that supports your professional development and services that help you boost those sales. We will do everything we can to help you succeed.

### #2 Continuous development

We make sure you are always aware of the latest trends and techniques before your clients ask for them. We live and breathe the hair salon industry, and we consider it a matter of honor to inspire you and help you develop your professional skills.

### #3 Personal service

Our clients are served by real people. We visit you in person, answer the phone, chat on social media – wherever you are. Whether you're looking for a new color recipe, consultation help with the products or just a comforting shoulder, we're right here.

### #4 A community of shared values

Four Reasons is a community of hair professionals who are passionate about hair. Our mission is to make everyone feel great about themselves. We support each other and help make people's wildest hair dreams come true – for the love of individual beauty.

Based on the results of our personnel survey, we have received an honourable mention as one of Finland's most inspiring workplaces for several years in a row.

We engage in continuous product development in which we also pay special attention to preventing hair stylists' occupational diseases.

Our goal is to have the best employee experience and the healthiest customers in the beauty industry

We want to make you feel gorgeous just the way you are. We develop products and services that provide better hair days for an increasing number of different hair types.

We support the financial well-being of stylists with, for example, fast deliveries, flexible payment terms, sales promotion campaigns and educations.

# OUR SUSTAINABILITY IN A NUTSHELL

All Four Reasons products are 100% vegan, meaning they do not contain any animal-based ingredients.

The Four Reasons cleanse and care products manufactured in Finland are made with certified and 100% renewable wind power.

Our goal is to enable sustainable choices for our customers, taking into account environmental aspects from the entire life cycle of the product

Since the start of our packaging renewal in 2018, we have moved on to using recycled plastic, bio-based plastic or other non-virgin materials whenever possible. 100% of our packaging can be recycled when empty.

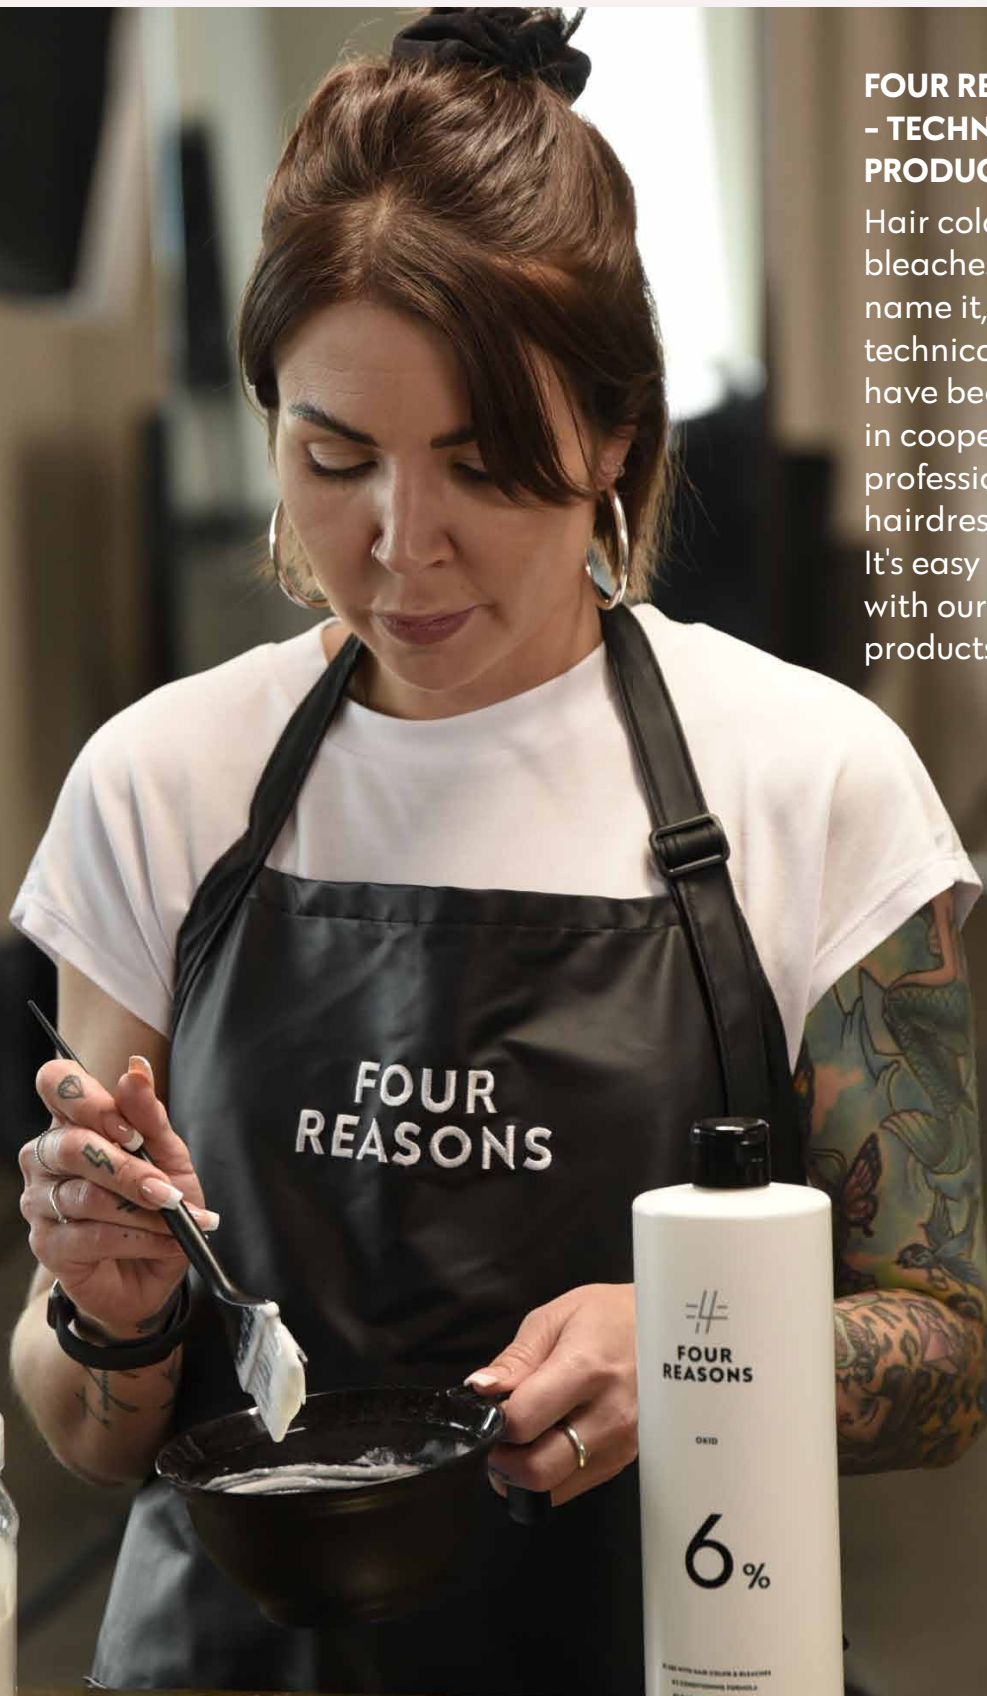

We participate in the global fight against climate change with the aim of achieving carbon neutrality in our operations by 2029.

# TECHNICAL PRODUCTS

## FOUR REASONS - TECHNICAL PRODUCTS

Hair colors, developers, bleaches, perms – you name it, we got it. Our technical products have been developed in cooperation with professionals in the hairdressing industry. It's easy to succeed with our reliable color products!

# FOUR REASONS OPTIMA

## FOUR REASONS OPTIMA – COVERAGE, SHINE, RICHNESS

Four Reasons Optima is a modern color series for versatile hair coloring, when you want **a long lasting hair color with excellent coverage and tone-rich end results**. Optima blurs the line between permanent and semi-permanent color – you can use the same versatile color line for all kinds of color work that is needed in the salon.

The color series is divided into seven shade families, which make it easier to choose a shade and to adopt the entire shade range. The shade selection includes both pure Intense shades and ready-made current Reflections shade mixes. The color series contains two shade families for grey coverage: the ready-made grey coverage shades of the Cover shade family for different degrees of darkness, and

the **Optima Total base colors with guaranteed 100% grey coverage** in up to 10 minutes. The range of shades for blonde hair is diversified by Highlift lightening colors and Optima Liquids shades for toning and folding of lightening.

The Four Reasons Optima color series is **perfume-free and vegan**. The plant-based formula contains repairing and moisturizing HydraRepair™ technology and nourishing natural oils. Thanks to its composition, the color mixes easily and is quick to apply. After the Four Reasons Optima coloring, the hair has a deep, shiny tone and it feels supremely soft.

**#1 EXCELLENT COVERAGE**

**#2 BRILLIANT SHINE**

**#3 PERFUME-FREE**

❤️ @salonhothair

## FOUR REASONS OPTIMA MAKEOVER

A3283 | 250ml

- Creates the perfect base for the color pigments to work in an ideal way
- Ensures a clean, luscious and tone-rich coloring result
- Nourishing ingredients protect hair from the stress of color removal
- Ammonia-free and perfume-free

### Use Four Reasons Optima Makeover for removing previous color before dyeing when

- you want to achieve a clear tonal change in the hair
- there is a clear layer of colors on the ends of the hair
- you want to remove direct dye effectively and quickly

## FOUR REASONS OPTIMA CLEAR BOOSTER WITHOUT AMMONIA

Four Reasons Optima Clear Booster enhances the Optima color's bleaching effect and evens out the different shades in colored hair, and enhances the coverage of the hair color in resistant hair, for example with grey coverage. With Optima Clear Booster, you can also lighten the color treated hair subtly, which means that you can brighten the tone lightly without using lightening color. You can mix Optima Clear Booster with all Optima tones, except the highlift shades line 11.

## FOUR REASONS OPTIMA TOTAL – UNFAILING COVERAGE IN ONLY 10 MINUTES!

Total complements the Optima color range

Four Reasons Optima Total, designed for roots touch-ups, is a color product with guaranteed **100% grey coverage**. Coloring with the Four Reasons Optima Total range is exceptionally quick: the **10-minute processing time** cuts the time needed for coloring and also provides the hair stylist with an opportunity to offer additional services with good profit.

The Four Reasons Optima Total color range includes fermented green coffee beans with antioxidant polyphenols and caffeine that stimulate microcirculation in the scalp and promote the wellbeing of the scalp. The Optima Total color line is **perfume-free and vegan**. Contains ammonia.

60ml

**CHOOSE OPTIMA TOTAL WHEN YOU WANT**

- total coverage of grey hair
- a compact shade palette
- complete your tools for grey coverage
- a good additional service for your hair salon

**Tone selection:**

**NN tones:**

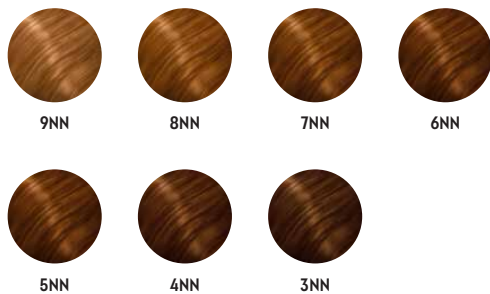

**3NN, 4NN, 5NN, 6NN, 7NN, 8NN, 9NN**

Neutral base tones with intense coverage. Classic tones that are traditionally most used in grey coverage, in particular.

**Mixer tones:**

**4-6A, 4-6B, 4-6BM, 6V, 6MR, 7-9A, 7-9B, 7-9BM**

Are you craving more vibrant tones? Choose the Optima Total mixer tones with which you can add a colder or warmer tone to the base color selection. The range also features red and purple tones that are excellent for grey coverage.

**#1 RELIABLE 100% GREY COVERAGE**

**OPTIMA LIQUIDS**

**MIXING RATIO**  
**1:1**

**PROCESSING TIME**  
10-20MIN

**THE BRIGHTEST BLONDS**  
**- OPTIMA LIQUIDS**

Four Reasons Optima Liquids is a hair color for toning, neutralising and clarifying bleached hair. The topical selection of pure blonde tones is designed for bleaching in which you want to add tone to the bleached base while maintaining the brightness of the color. When paired with the Optima Liquids Activator developer, the product's liquid consistency blends into a mass that is easy to lather and also fast and cost-effective to use at the shampoo station.

Four Reasons Optima Liquids contains a unique compound of hydrolysed proteins that repairs and strengthens hair by preventing it from splitting and also protecting the hair from damage caused by chemical treatments. Other pampering ingredients include Ecocert certified Limnanthes alba seed oil that leaves your hair glossy and soft, and baobab oil that moisturises the hair effectively due to its high content of vitamins A, D, E, and F. Four Reasons Optima Liquids is **perfume-free** and **vegan**.

#  
**FOUR REASONS**  
LUXIMA

## FOUR REASONS LUXIMA – NATURAL, MULTIDIMENSIONAL, GLOSSY

Four Reasons Luxima is a versatile color series that leaves the hair with an exceptional shine and enables **natural-looking, three-dimensional results**. Based only on toned pigments, the composition of Four Reasons Luxima reveals the subtle differences in depth in the base and creates a three-dimensional impression. The vitamins and vegetable oils of Luxima's unique Shine Enhance Complex shine compound enhance the light-reflecting ability of color pigments. The end result is always individual, exceptionally vibrant and multi-toned – exactly what today's customers want.

The Four Reasons Luxima shade selection is divided into six color families. The shade selection is based on the Browns, Blonds and Pastels color families, which can be adjusted with a versatile selection of intense Mixers shades. With the help of Base shades that increase the coverage and smoothing

ability of the color, it is easy to darken or brighten the basal growth and cover the greys 100%. Express shades are a selection of cold, natural shades and light folding shades for quick hair coloring and color correction with a 5-minute effect time.

Four Reasons Luxima hair color is **ammonia-free and vegan**. The easy-to-apply and a gel-like composition of the color and the effect time of only 15 minutes offer an economical way to dye your hair. Low-alkaline Luxima colors hair gently – it doesn't lift the hair's natural base, so you don't need to worry about unwanted warm tones. All shades have a yellow fold ready, which makes it easier to tint blonde hair successfully. Hair toned with Luxima never looks dyed or unnatural; instead, it sparkles in a clear and natural way.

# BLEACHES

## Take your bleaching to the next level

Our range of bleaches includes solutions for all the bleaching works of a salon, such as major color changes, foil highlighting and bleaching roots. Each bleach has a different composition and special characteristics to make it easier to work with various lightening techniques. All our bleaches have a perfume-free, ammonia-free, and vegan composition.

### FOUR REASONS HYDROBLEACH

A4117 | 500g

A4118 | container

#### A modern bleaching product for all lightening services and techniques

- Lightens the hair by up to 7 levels\*
- The Hydroshield technology protects the hair during bleaching
- A soft paste suitable for various techniques
- Ammonia-free and perfume-free

#### Pick me when

- you want to save time; you can safely lighten up to four times in a row with the same treatment without washing the hair between treatments
- you want to minimize the harmful effects of bleaching on the structure of your hair or you work with pre-lightened hair

@hairbylindal

### FOUR REASONS BLEACH

A3823 | 500g

A3824 | container

#### A safe dust-free bleaching product

- Lightens up to 7 levels\*
- Completely dust-free consistency
- A thick, firm paste
- Ammonia-free and perfume-free

#### Pick me when

- you do not aim for a clean lightening base
- you tone hair to a warm tone after lightening
- you lighten hair which is easy to bleach

@hairbyelisa

### FOUR REASONS CLASSIC BLEACH

A4180 | 500g  
A4181 | container

**An effective bleaching product for all kinds of bleaching work**

- Lightens up to 8 levels\*
- A dust-free consistency
- A soft and creamy composition
- Ammonia-free and perfume-free

#### Pick me when

- you want to work with an effective, classic bleaching product
- you do precise bleaching work, such as foil highlights

Watch our bleaching education

@hairbylindal

### FOUR REASONS ULTRALIFT 9+

A3825 | 500g  
A3826 | container

**An effective bleaching product for completely clean lightening base**

- Lightens up to 9 levels\*
- A moist, flexible and easily applied paste
- Ammonia-free and perfume-free

#### Pick me when

- the hair is in normal or good condition
- you want a completely clean lightening base
- you tone hair to a cool tone after lightening

@hairbyelisa

### FOUR REASONS BLEACH CREAM

A4274 | 250ml

**A creamy bleaching product**

- Lightens the hair by up to 7 levels\*
- The nourishing plant-based oils protect the hair during the bleaching process
- Creamy consistency
- Ammonia-free and perfume-free

#### Pick me when

- you are bleaching the roots
- you want to work with a pleasant creamy consistency

\* The darkness of the hair to be processed and oxidizer concentration may affect the bleaching result.

# OTHER TECHNICAL PRODUCTS

A4040 | 50ml

## FOUR REASONS VIOLET DROPS

Toning drops to be added to a color or bleach

- #1 Neutralizes yellow tones
- #2 Mix with color or bleach
- #3 Adjustable intensity
- #4 Perfume-free

Contains violet direct dye pigment that remains stable in the bleach or dye and effectively tones out the yellow tones in the base. Use only with dyes with developers or bleaches!

**HOW TO USE:** Stir the drops into a pre-mixed color/bleach mixture. For neutralizing yellow tones: 5-15 drops per 100g/3.5 fl. oz. of pre-mixed color or bleach mixture. Adjust the amount of drops depending on the desired intensity of neutralizing yellow tones. In case any section of highlights over tones, you can use a light warm-toned direct dye to neutralize the effect. When using the drops for toning, mixing ratio is max 1:5. Intended only for use with oxidative colors.

A3827 | 100ml

## FOUR REASONS SEAL & SHINE OIL

An oil that protects the scalp

- #1 Protects the scalp
- #2 Boosts shine
- #3 Makes mixing easy
- #4 Perfume-free

**Protective, shine-boosting oil for scalp and skin.** Prevents the color from staining the skin when applied around the hairline. When mixed with hair color protects the scalp, evens out the result in porous hair and acts as a shine booster. Can also be used with perms for scalp protection.

**HOW TO USE:** As a protective cream: Apply the product around the hairline before applying the color or perm. As a shine booster: Add 1-4g in the color mass and mix carefully. Apply the color normally. Luxima: Add 1-4g in the color mass at the nozzle bottle and mix carefully.

A4406 | 250ml

## FOUR REASONS COLOR LOCK

Post-Color Treatment Spray for longer-lasting hair color

- #1 Prevents color fading
- #2 Neutralises chemical residues
- #3 Balances pH level
- #4 Perfume-free

The treatment spray for longer-lasting hair color closes the surface layer of the hair and locks in the color pigment, neutralising the pH of the hair. It corrects the moisture balance in the hair and makes it easier to comb. Always recommended when dyeing with a hair color requiring a developer, particularly with blonde tones. The active ingredient, fermented coffee bean extract, contains plenty of antioxidants and polyphenols that stop the oxidation process taking place in the hair during the coloring process.

**HOW TO USE:** After rinsing off the color and washing the hair, towel-dry and apply the treatment spray evenly everywhere in the hair, emulsify lightly and let sit for 3 minutes. Rinse and continue the usual treatment.

A3828 | 100ml

## FOUR REASONS CLEAN

Color stain remover

- #1 Cleans color-stained skin
- #2 Gentle for skin
- #3 Easy to use
- #4 Perfume-free

Removes color stains efficiently and gently from the hairline after color has been applied or after the coloring process.

**HOW TO USE:** Wet a cotton wool in the liquid and wipe the excess color from the skin during the processing time.

# ESSENTIALS FOR THE FOUR REASONS SALON

A4248 | 500ml

## **FOUR REASONS DISINFECTANT SURFACE CLEANER**

### **Disinfectant Power Cleanser**

Are you looking for a cleaning product that both cleans and disinfects surfaces at the same time? Here it is – an effective cleaning product for all water-washable surfaces in the salon. Four Reasons Disinfectant Surface Cleaner, a fragrance-free disinfecting power cleanser instantly cleans dirt from the surfaces of customer places, door handles, the kitchen, a coffee room or, the toilets.

**HOW TO USE:** Clean the surfaces first. Turn nozzle to spray position. Spray the product on the surface to be disinfected and let stand for at least 5minutes. Dry with a clean cloth.

- #1 Buh-bye, germs!
- #2 For all surfaces
- #3 Almost too effective (99.9% to be exact)
- #4 Perfume-free

A4245 | 400ml

## **FOUR REASONS HAND SOAP**

### **Gentle and Moisturizing Hand Soap**

In the hairdressing salon, hands are washed frequently along the day and the hands may dry out from the products that wash vigorously. Invest in the soap used in your hair salon and your hands will thank you! Four Reasons Hand Soap contains almond oil, known for its nourishing and softening properties, and moisturizing glycerol. The product has a wonderfully soft, creamy almond scent!

- #1 Oh, so gentle
- #2 Squeaky clean
- #3 Moisturizing effect
- #4 Soft & creamy almond scent

A4246 | 400ml

## **FOUR REASONS HAND CREAM**

### **Nourishing and Protective Hand Cream**

What properties do you require from the hand cream you use after washing your hands at work? Very moisturizing, quickly absorbed, effective active ingredients and a wonderfully soft feeling in the hands? Four Reasons Hand Cream combines all of these! In addition, the cream has a sweetly soft, indulgent scent of almonds. Ah, perfectly charming, caring hand cream for the hair salon's coffee room for the staff or for the joy of clients with dry hands!

- #1 Nourishing effect
- #2 The quickest dry
- #3 Oh shea... what a shield!
- #4 Soft & creamy almond scent

A hairdresser with grey hair and sunglasses on his head is styling a client's hair in a black salon sink. The client's hair is wrapped in curlers. The hairdresser is using a showerhead to spray water onto the hair. The background is dark and out of focus.

# CURLING AND SMOOTHING PRODUCTS

With our modern high-quality Four Reasons curling agents you can provide your customers with exactly the curls they want, taking individual needs into consideration - no matter what you wish for enchanting curls, charming waves or shine and manageability for coarse hair.

## FOUR REASONS MULTIWAVE

Four Reasons Multiwave is a three-phase, low-alkaline perm solution for all curl treatments. The product does not contain thioglycolate and ammonia, which protects the hair from damage and reduces scalp irritation. Available in three different strengths, all of which have an effect time of 10min. The end result is long-lasting, natural-feeling curls. Perfume-free. The packaging is made of recycled plastic.

<b>Four Reasons Multiwave A</b>   Perm solution Normal, strong and hard-to-curl hair.	A4133	85ml
<b>Four Reasons Multiwave B</b>   Perm solution Color-treated, soft and easily curled hair.	A4134	85ml

Four Reasons Smoothing Treatment A4243 | 500ml

## FOUR REASONS SMOOTHING TREATMENT

Silky soft, long-lasting smoothness for all hair types. Four Reasons Smoothing Treatment smooths and softens naturally wavy and coarse hair, making the hair more manageable and shiny.

The gentle, easy-to-use semi-permanent smoothing product is suitable for all hair types and won't damage even heavily processed hair. This is a one-size-fits-all kind of product for hair of any type and condition, even bleached hair if the processing time and quantity of strokes is selected based on hair.

The product consists of unique, vegan ingredients that are a perfect substitute for the animal-derived keratin commonly used in straightening products.

### Why Smoothing Treatment?

- Tame frizzy and unruly hair
- Easy to use – one product, different processing times
- Expand your service selection
- Opportunity for additional services with good profit

**#1 SMOOTHING, VEGAN KERATIN TREATMENT**

**#2 THE EFFECT LASTS FOR UP TO 4 MONTHS**

**#3 SUITABLE FOR ALL HAIR TYPES**

**#4 PERFUME-FREE**

- #2 Improves hair elasticity and combability
- #3 Reduces frizz
- #4 Reduces damage to the hair structure

## DID YOU KNOW?

Four Reasons Color Mask products are PPD-free.

# FOUR REASONS COLOR MASK

## FOUR REASONS COLOR MASK

A perfect blend of treatment and tint!

Four Reasons Color Mask is a selection of toning products that allow you to emphasize hair tone either subtly or boldly. The nourishing and pigment-rich composition is vegan and extends the lifetime of a hair color while maintaining its intensity.

- #1 Extends the life of a hair color
- #2 Boosts the intensity of a hair color
- #3 Gives hair a vibrant blaze of color
- #4 Maintains the cool or warm tones of a hair color

## TAKE ADVANTAGE OF ALL THE POSSIBILITIES FOUR REASONS COLOR MASKS HAVE TO OFFER!

### #1 Post-pigmentation at the shampoo station

Color Mask is a foolproof technical tool for post-pigment hair! If, at the shampoo station, you notice that the tone needs more pigment or some sections were not evenly colored, for example, due to the inconsistent structure or porosity of the hair, you can even out the end result with the right Color Mask product easily and quickly.

### #2 Hair color maintenance at home or in a salon

Color Mask is a beautiful hair color's best friend – also at home! Recommend a Color Mask product to maintain the glossy hair color for each of your toning and color treatment customers. The Color Mask products

maintain both light and dark tones excellently, prevent the color from fading in between dyeing sessions, and keep the hair glossy and lively. You can also treat your hair gently by using Color Mask; you may not need to dye the entire length of the hair during the salon session, but a simple root touch-up and a Color Mask treatment may do the trick.

### #3 Confirming the tone

It can sometimes be challenging to maintain the glow of the hair color, for example, due to the porosity of the hair. You can add intensity and longevity to the intense tones that fade fast, such as, rich browns, sassy red and copper tones, or strong neutralizing tones, by layering pigment onto the hair at the shampoo station with a Color Mask treatment.

**PRICE POINT**

**WHY COLOR MASK?**

- Wide selection of shades
- Must have products to maintain the tone at home
- A great technical product for post-pigmentation, color correction and tone strengthening and finishing at the wash station

**SUSTAINABILITY**

- The packaging is 100% recyclable
- All products are vegan

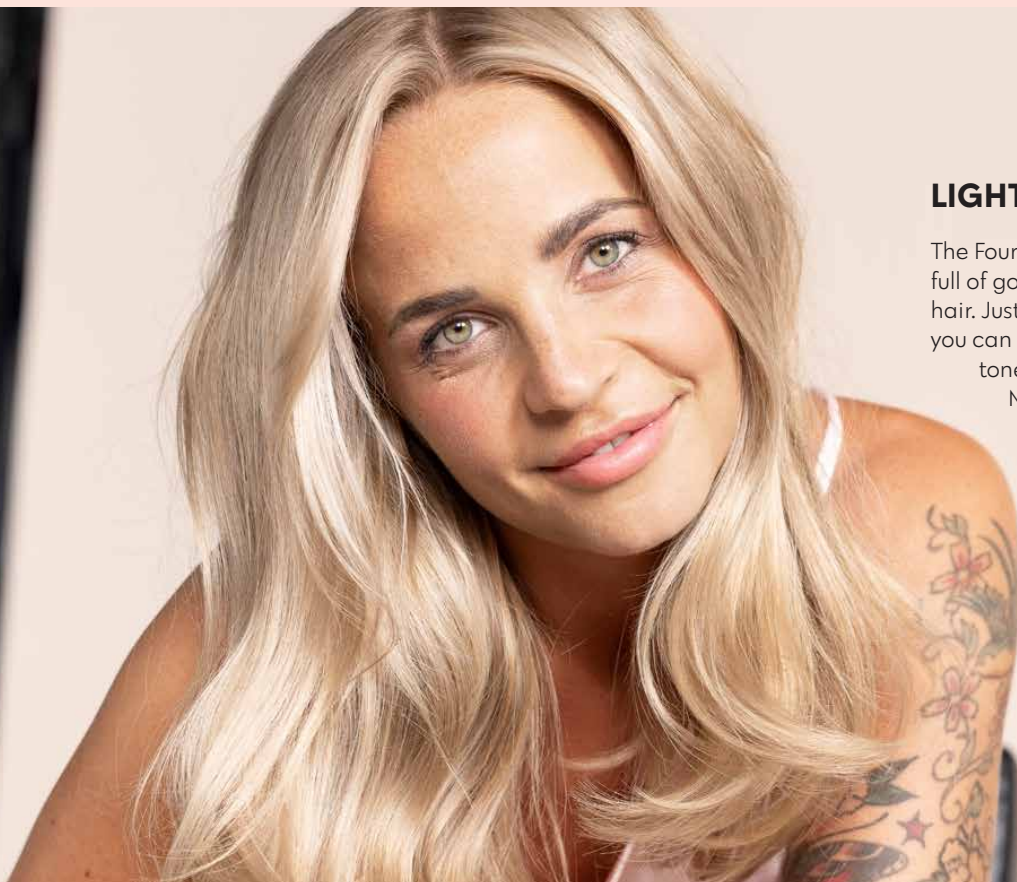

### #4 Perfecting the tone

You know the feeling, when you would just need a bit more of a peachy tone or a teeny-tiny hint of pink to make that P-E-R-F-E-C-T tone? Alone or mixed, the Color Mask products give you endless possibilities to fine-tune the color and tone the ends. You also save a considerable amount of time compared to toning the hair with oxidative dyes, as you don't need to wash off the Color Mask product – just rinse.

# FOUR REASONS

COLOR MASK

## LIGHT TONES

### LIGHT COLOR MASK TONES

The Four Reasons Color Mask selection is full of gorgeous toning products for blond hair. Just like other Color Mask products, you can see the best results of the light tones in treated, bleached hair.

Maintain a cool blond with a pearl or silver tone, create a warm Hollywood glow, or tone your hair into a perfect strawberry blond. Make sure to always select an intensive treatment with your shampoo – bleached hair requires particularly gentle care.

SEE COLOR CHART ON PAGE 45.

#### TONING TREATMENT SILVER

- #1 For colored very light blonde/grey hair

# SHAMPOO, TREATMENT OR INTENSE?

## Four Reasons Color Mask Shampoo

Select a shampoo when you need to strengthen the intensity and glow of a hair color. The super-pigmented shampoos tone the hair effectively: get quick results and intense tone. The hydrolyzed wheat protein and panthenol (vitamin B5) in the shampoo strengthen dyed hair.

## Four Reasons Color Mask Treatment

Give hair a pampering intensive treatment when the hair color needs some refreshing or tired hair needs a special pick-me-up. The plant-based proteins and amino acids in the toning intensive treatments treat the hair effectively, which results in shiny and glossy hair. The best: most of our Color Masks are available as both shampoos and intensive treatments. Everything is more fun in twos!

## Four Reasons Color Mask Intense Toning Treatment

Grab this intensive treatment tube that is rich in pigment when you want a really bright blue, violet, pink, fuchsia, red, orange, or yellow tone that is easy to apply and lasts almost too long. An abundance of high-quality pigment gives the hair an intense tone and a vibrant end result.

# CHOOSING THE RIGHT COLOR MASK SHADE

Always choose a shade according to the lightest part of the hair:

FOUR REASONS COLOR MASK	COOL - WARM	SHAMPOO	TREATMENT	HAIR COLOR SCALE												
				10	9	8	7	6	5	4	3	2	1

**Fine Volume Spray**

A4167 | 250ml

- #1 Gives hair full-bodied volume
- #2 Makes hair look thicker
- #3 Leaves hair naturally soft and airy
- #4 Removes excess oiliness from the roots

# HOLD THE LINE

How about a hairspray for each hair type and every hairstyle? Five different hairsprays may seem like an exaggeration to some, but as you know as a professional, more is better when it comes to hair. Dry and fine-textured Styling hairsprays provide hold while maintaining the natural movement of the hair, while Freeze & Shine is perfect for days when you don't want even one lock to move. Strong Hairspray as well as Super Strong Hairspray are traditional hairsprays in between those mentioned: they fix all hairstyles and protect from moisture.

### STYLING HAIRSPRAY

Quick-drying, weightless hairspray

- #1 For styling and working on hairstyles with natural finish
- #2 Gives airy and natural support
- #3 Leaves hair with natural movements
- #4 Fruity scent

# TAKEAWAY COLOR

## FOUR REASONS ORIGINAL TAKEAWAY COLOR

Easy to recommend: demi-permanent hair color for home use!

The Four Reasons Original range of home color is a perfect solution for ensuring continuous hair care between appointments. Recommend Four Reasons Original Takeaway Color to your clients to make sure their hair is looked after before the next visit. This not only ensures that the hair remains vibrant, but also makes the coloring process easier on the next visit, as you know what the client has colored their hair with. The colors are ammonia-free, perfume-free, and vegan.

### WHY ORIGINAL TAKEAWAY COLOR?

- Wide range of shades and a beautifully glossy finish
- The thrifty customer who used to buy hair color at the market will now buy it in your salon for home use.
- A safe color kit for home use when your appointment calendar is full

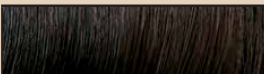

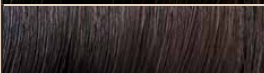

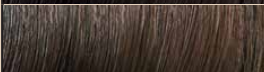

- #1 A beautiful finish with a gentle touch
- #2 A natural, beautifully softening shade over time
- #3 A range of shades also for covering grey
- #4 Ammonia-free & perfume-free

does not tear when wet. The roll design takes up  
as little space as possible. Material: 60g/m2 airlaid  
cellulose fibre. Size: 40 x 60cm.

B1313 | 50pcs

**INSTRUCTIONS FOR USE OF  
TECHNICAL PRODUCTS**

# FOUR REASONS OPTIMA

## INSTRUCTIONS FOR USE

### SHADE FAMILIES WITH CHARACTER

- COVER shades**  
Cover shades combine powerful coverage and a brown tone. The shades have been divided into three groups:
  - cool **NNA** shades
  - neutral **NNB** shades
  - warm **NNW** shades

- INTENSE shades**  
Intense shades are intensive and pure. They can be used alone to create a strong tone or mixed with other shades when you want to intensify the shade's character.

- REFLECTION shades**  
Reflection shades are pre-mixed, natural and soft tone combinations that create various different brown and copper tones.

- MIXER shades**  
Mixer shades give an intensive shade without any coverage. When strong shades are wanted, you can use Mixers alone with 1,5% or 3% Cream Oxid developer. When creating pastel shades, add a Mixer shade to the chosen color, the maximum amount is 20% of the entire color mixture, depending on the base and the desired intensity of the result.

- HIGHLIFT shades**  
Highlift shades achieve a powerful lightening effect and an effective neutralizing of yellow tones at the same time.

#### Shade system

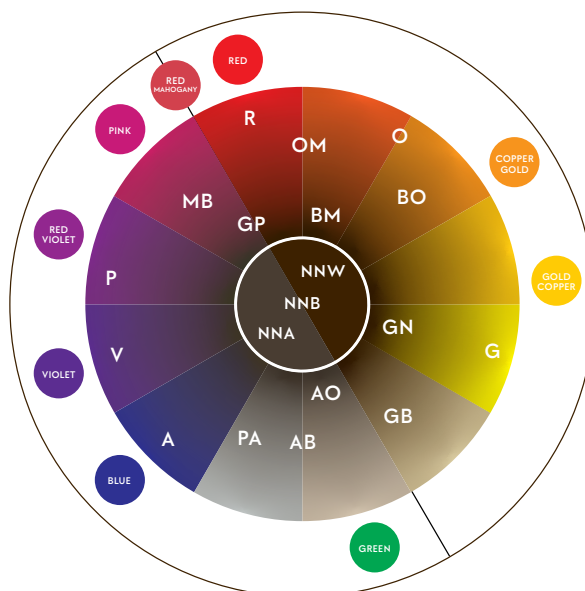

The shades are marked with letters to make it easier to understand Optima's shade logic.

- The number in front of the letter gives you the shade's level of depth
- The first letter gives the primary tone
- The second letter gives the secondary tone

### CHOOSING THE SHADES

- Determine the hair's natural level of depth and the amount of grey hair, as well as the artificial color's level of depth and tone.
- Determine the level of depth and the tone of the desired result.

Grey coverage: Use the Cover shade of your choice. If you want to add more tone to the result, add an Intense or Reflection shade into the Cover shade you have chosen, a maximum of ½ of the total amount of color mixture.

- |                   |              |
|-------------------|--------------|
| N = Neutral       | W = Warm     |
| A = Ash           | P = Pearl    |
| G = Gold          | O = Copper   |
| R = Red           | M = Mahogany |
| B = Beige / Brown | V = Violet   |

For example: **9AO** / 9 = level of depth, A = primary tone, O = secondary tone

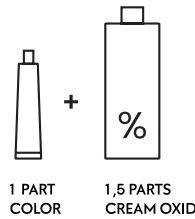

## MIXING RATIO

### COVER, INTENSE, REFLECTION AND MIXER SHADES:

#### MIXING RATIO IS 1:1,5

(1 part color + 1,5 parts Cream Oxid)

Color (g)	Developer (g)	Total (g)
20	30	50
40	60	100
60	90	150
80	120	200
100	150	250

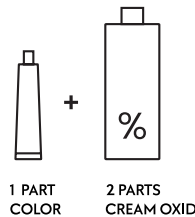

### HIGHLIFT SHADES:

#### MIXING RATIO IS 1:2

(1 part color + 2 parts Cream Oxid)

Color (g)	Developer (g)	Total (g)
20	40	60
40	80	120
60	120	180
80	160	240
100	200	300

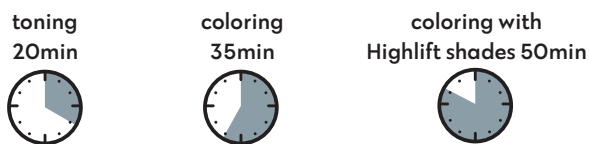

## DEVELOPER CHOICE

Choose the Cream Oxid developer strength according to the current base and the shade you have chosen:

	Cream Oxid
Coloring damaged or lightened hair	1,5%
Coloring to the same level of depth or darker	3%
Grey coverage and coloring 1-2 levels lighter	6%
Coloring 2-3 levels lighter	9%
Coloring over three levels lighter (Highlift shades)	12%

## APPLICATION AND PROCESSING TIME

Apply to hair and let process:

Increasing the processing time with 5-10minutes will make the result more intense.

After the processing time, wash and condition the hair.

## MAKEOVER – COLOR REMOVER FOR OXIDIZING COLOR AND DIRECT DYE

Four Reasons Makeover is a fantastic tool when you want to create the most tone-rich result possible; the product creates the perfect base for the color pigments to work in an ideal way.

When you want a clear tonal change in the hair, for example from ash to gold or from cool red to copper, the best quality result will be achieved by first removing the current color before coloring. This way the color will be richer and purer in tone.

Color removal is also recommended when the ends have several visible layers of different colors or when you want the result to be clearly lighter than the current color. If the artificial, current tone is clearly different or its level of depth is darker than the desired result, a Makeover color removal process before the coloring is also recommended.

Makeover is easy to use and also works as an effective and quick direct dye remover. Assess the condition of the hair carefully before using as the product is quite powerful. Baobab seed oil, avocado oil and bamboo extract nourish hair and protect its structure from the stress of color removal.

### Instructions

#### Removing oxidizing color:

Mixing ratio 1:3, 3% Cream Oxid.

(1 part Makeover powder + 3 parts 3% Cream Oxid developer)

Processing time up to 30min maximum, covered with a hood, without heat.

#### Removing direct dye:

Mixing ratio 1:1 with lukewarm water or 1:3 with 3%

Cream Oxid depending on the desired effectiveness.

Processing time up to 30min maximum, covered with a hood, without heat.

## CLEAR BOOSTER WITHOUT AMMONIA

**Bright base:** When toning bleached hair, you can use Optima Clear Booster to clear the tone while simultaneously brightening the base. You can mix Optima Clear Booster with all Optima tones, except the product line 11.

**Enhance the hair color's grey coverage:** If you want to enhance the capacity of Optima Cover tones to cover grey hair, add a maximum amount of 1/4 of the color mass of Optima Clear Booster to a ready-mixed color mass. Please note! You do not need to add more developer.

**Brighten up those darkened ends:** If the customer's hair has darkened too much at the ends, apply Optima Clear Booster to the ends to brighten the tone conveniently as the root dye processes.

**Intensify the color:** When you want to get the most intensive result while toning dyed hair with, for example, red colors, add 1/3 Optima Clear Booster to the dye (e.g. 7R) that is applied to the ends and increase the developer by one 3% → 6%.

### Instructions

**Mixed in the color mass:** Mix Optima Clear Booster with the desired color by applying 1/4-1/2 of product per the amount of color mass. Let the dye process normally.

**On its own:** Use Optima Clear Booster to lighten dyed hair by mixing it with Four Reasons Optima Cream Oxid developer 6-12% with a mixing ratio of 1:1.5. Lightening efficiency approximately 1-3 levels depending on the darkness level of the hair. Processing time 20-40minutes.

## FOUR REASONS OPTIMA TOTAL

**#1 RELIABLE 100% GREY COVERAGE**

**#2 QUICK TO USE – PROCESSING TIME ONLY 10MINUTES**

**#3 BEAUTIFUL AND NATURAL FINISH**

**#4 EASY TO USE**

### TOTAL COMPLEMENTS THE OPTIMA COLOR RANGE

Optima Total, designed for roots touch-ups, is a color product with guaranteed 100% grey coverage. Coloring with the Optima Total range is exceptionally quick: the 10-minute processing time cuts the time needed for coloring and also provides the hair stylist with an opportunity to offer additional services with good profit.

The Optima Total color range includes fermented green coffee beans with antioxidant polyphenols and caffeine that stimulate microcirculation in the scalp and promote the wellbeing of the scalp.

The Optima Total color line is perfume-free and vegan. Contains ammonia.

### OPTIMA TOTAL TONE SELECTION

#### OPTIMA TOTAL NN TONES

3NN, 4NN, 5NN, 6NN, 7NN, 8NN, 9NN

Neutral base tones with intense coverage. Classic tones that are traditionally most used in grey coverage.

#### OPTIMA TOTAL MIX TONES

4-6A, 7-9A ash as a tone  
 4-6B, 7-9B brown as a tone  
 4-6BM, 7-9BM warm brown as a tone  
 6MR red mahogany as a tone  
 6V violet as a tone

Choose the Optima Total mix tones with which you can add a colder or warmer tone to the base color selection.

#### Optima Total Activator 8% developer

Only use the Optima Total Activator developer with the Optima Total colors. The developer has been designed for developing quickly oxidizing pigments and enables intense coverage fast.

## INSTRUCTIONS FOR USE

### RELIABLE NEUTRAL TONES & CREATIVITY MIX TONES

The Optima Total color range consists of the NN base tones and mix tones with depth levels 4-6 and 7-9. Select the depth level from the NN base colors and the possible tone from the mix tones:

- Optima Total mix tones 4-6 can be mixed with Optima Total base tones 4, 5, 6
- Optima Total mix tones 7-9 can be mixed with Optima Total base tones 7, 8, 9
- When the Optima Total mix tones are used on their own, the final depth level will be 5 (4-6) and 8 (7-9)
- RED MAHOGANY 6MR and VIOLET 6V can be used by itself or can be mixed with NN basic tones.

#### Mixing ratio

Desired result:	NN base tone	Mix tones
Hint of mix tone in result	2/3 part	1/3 part
Normal amount of mix tone in result	1/2 part	1/2 part
Significantly of mix tone in result	1/3 part	2/3 part

### MIXING RATIO & PROCESSING TIME

#### MIXING RATIO 1:1

(1 part color + 1 part Total Activator)

#### PROCESSING TIME 10 MIN

Optima Total developing time is 10minutes.

Apply color to lengths during the final 3-4minutes of processing time only if the previous hair color is extremely faded.

### INSTRUCTIONS FOR USE

1. Determine the depth level and tone of the lengths and ends.
2. Mix the Optima Total color with the Optima Total Activator developer in a non-metallic bowl. Use a 1:1 mixing ratio and mix thoroughly.
3. Apply the color to the roots only, as the Optima Total colors may darken colored hair. If there is more grey in certain sections, apply the color first to those sections (for example, the temples first and then the rest).
4. Processing time is 10minutes.
5. After the processing time, emulsify with water, rinse and wash the hair with shampoo.

### NOTE

- Start the 10-minute processing time only after the color has been applied throughout.
- Follow the indicated processing time; the product works effectively and rapidly.
- Apply color to lengths during the final 3-4minutes of processing time only if the previous hair color is extremely faded. You can easily and gently freshen the ends with the Four Reasons Luxima color range, for example.
- Only use the Optima Total Activator developer with the Optima Total colors.
- Optima Total colors cannot be mixed with other hair colors.

## FOUR REASONS OPTIMA LIQUIDS

#1 FOR GLOSSING BLEACHED HAIR

#2 BRIGHT, PURE TONES

#3 QUICK TO APPLY AND SHORT PROCESSING TIME

#4 PERFUME-FREE

### THE BRIGHTEST BLONDS – OPTIMA LIQUIDS

Four Reasons Optima Liquids is a hair color for toning, neutralising and clarifying bleached hair. The topical selection of pure blonde tones is designed for bleaching in which you want to add layers to the bleached base while maintaining the brightness of the color. When paired with the Optima Liquids Activator developer, the product's liquid consistency blends into a mass that is easy to lather and also fast and cost-effective to use at the shampoo station.

Four Reasons Optima Liquids is perfume-free and vegan. Contains ammonia.

### OPTIMA LIQUIDS TONE SELECTION

All shades are without a depth level, giving only the depth that the shade adds.

AA - Pure silver  
PP - Cold pearl  
PG - Pearly sand  
RR - Warm pink  
PM - Cold muted rose gold  
OM - Warm muted peach  
GG - Light gold  
OG - Light golden copper  
CLEAR - Clear

#### Optima Liquids Activator 3% developer

With Optima Liquids tones, only use the Optima Liquids Activator. Developer is liquid and, when mixed with liquid color, forms an easily absorbed gel-like color mass that is quickly absorbed evenly into lightened hair.

## INSTRUCTIONS FOR USE

### BRIGHTEST BLONDS, TONING BLONDS

The Optima Liquids tone selection has been developed for toning bleached hair to maintain the brightest possible end result.

Optima Liquids contains ammonia, which is used to achieve the brightest possible and at the same time the most toned result. You can mix shades together and, if necessary, dilute the shade with Clear.

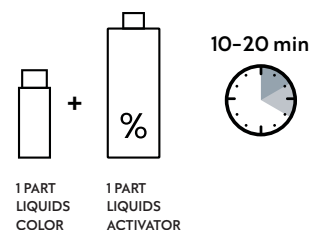

### MIXING RATIO & PROCESSING TIME

#### MIXING RATIO 1:1

(1 part Liquids Color + 1 part Liquids Activator)

#### PROCESSING TIME 10-20 MIN

You can check the end result by removing the dye from the hair surface using a hair dye brush, for example. During a longer processing time, ammonia lifts the lightening base even more.

### INSTRUCTIONS FOR USE

1. Measure the Four Reasons Optima Liquid color and Optima Liquid Activator in a non-metal bowl with the mixing ratio of 1:1.
2. Mix until the product turns into a gel-like composition.
3. Apply the dye mass to the hair in generous sections, starting from the roots. **Let the product absorb into the hair by massaging it throughout.**
4. Let sit for 10-20 minutes depending on the desired intensity. You can check the end result by removing the dye from the hair surface using a hair dye brush, for example.
5. After the processing time, wash and condition the hair with products appropriate for the hair type.

### NOTE

- Make sure that the lightening base is as even as possible to get the best result. If the lightening base is uneven, it will have an effect to the end result.
- When bleaching the roots, clean also old pigment residues out of lengths and ends. If any of the old pigment residues are left, it may have an effect to the end result.
- Product is very sufficient when it is absorbed into the hair by massaging. It takes one bottle for treating normal-thick long hair.
- When you treat highlighted hair, ammonia may lift the natural base.

## FOUR REASONS

LUXIMA

### BRILLIANT TONE RANGES

#### BASE shades

With Base shades, you can easily darken or lighten the natural base and cover greys for more concealment and smoothing. You can use Base shades with other colors or on their own.

#### EXPRESS shades

Cool, natural shades in different darkness levels and a range of light reflective shades for quick hair tinting and color correction. When used as is, the effect time is only 5 minutes.

#### BROWN shades

Muted, brown shades to freeze and deepen the tone of colored hair or to change the color in two different darkness levels: 4-6 and 6-8.

#### BLOND shades

Crushed shades for tinting, deepening and smoothing blonde hair in two different darkness levels: 7-9 and 8-10. All cool shades includes anti-yellow pigmentation.

#### PASTEL shades

Ready-made pastel shades with Luxima gloss and clarity. Use for tinting bleached hair or for pastelling Blond shades.

#### MIXER shades

Full-bodied blended shades from cold to warm, both pure and muted - use to enhance other shades or as is.

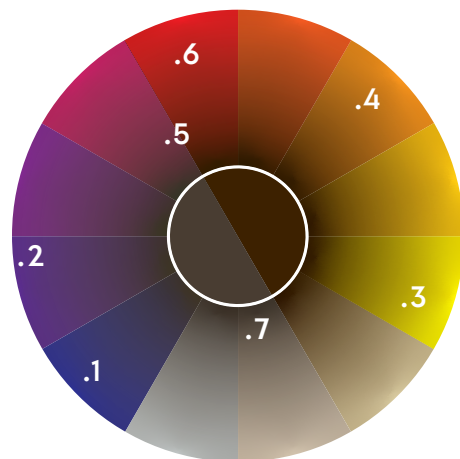

#### Numbering system

Shades are identified by numbers that indicate the darkness and character of the shade

- The first numbers indicate the darkness level of the shade, i.e. the amount of pigment.
- The last numbers are based on the color star and indicate the nature of the shade.

#### Choice of shades

1. Determine the natural darkness of the hair and the darkness and shade of the artificial color.
2. Determine the shade and translucency of the desired finish. If you want a multi-dimensional result, choose the Luxima shade you want to use according to the lightest part of your hair. If you want a more toned down and calm finish, choose a shade according to the darkest part of your hair.

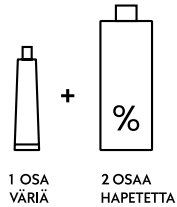

- |           |                    |
|-----------|--------------------|
| .1 Ash    | .5 Mahogany        |
| .2 Pearl  | .6 Red             |
| .3 Gold   | .7 Tobacco / Brown |
| .4 Copper |                    |

E.g. 7-9.16 Smoky Rose / 7-9 = the darkness of the base suitable for the color and .16 = the nature of the shade  
Please note that the final result on bleached hair will be about 8 in darkness, i.e. between 7 and 9.

## MIXING RATIO

mixing ratio is 1:2  
(1 part color + 2 parts oxidizer)

Väriä (g)	Hapetetta (g)	Yhteensä (g)
20	40	60
30	60	90
40	80	120
50	100	150
60	120	180
70	140	210
80	160	240
90	180	270
100	200	300

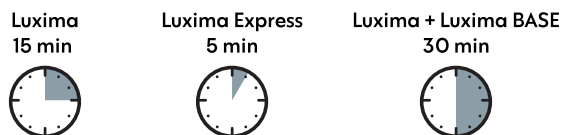

## CHOICE OF ACID

Choose the strength of the Cream Oxid acid based on your current base and the shade used:

	Four Reasons Oxid
Värjätyn tai vaalennetun hiuksen sävytys	1,5%
Tyvikasvun tummennus tai tasoitus Base-sävyyn avulla	3%
Tyvikasvun kirkastus Base-sävyyn avulla (noin 1 aste)	6%

## APPLICATION AND DURATION OF ACTION

Apply the color in fair sections on the hair, emulsify massage and leave on:

After the duration of action, emulsify, rinse and wash hair.

## LET YOUR CREATURE SHINE - TIPS FOR EFFECTIVE RESULTS

Four Reasons Luxima is a great aid for quickly releasing color vibrancy and shine, for example during a cut. The product tints streaked hair and intensifies existing color without darkening the base.

**When using Four Reasons Luxima, remember these tips:**

- Extending the duration of the effect can enhance the intensity of the final result. The longer the duration, the deeper and more intense the result.
- Strong differences in porosity in the hair will affect the final color result and the cool tones of the color mixes will be accentuated.
- The amount of color affects the intensity of the color. By rubbing the color throughout the hair, the unevenness caused by a small amount of color is prevented.
- When mixing Express shades with other Luxima shades, please note that the depth of the shade is accentuated by extending the duration of the effect.
- Blond shades already have a yellowing fold. If your base is completely pure blonde, you can tone down the yellowing by mixing in a shade such as .13.
- Use the Base shades with other Luxima shades to tone untreated hair. For example, if you also want to color the roots, mix Luxima with either a dark or light Base shade, depending on the desired result. Darker Base shades will increase the coverage of the color, while lighter Base shades will brighten and gently refract warm tones.

# FOUR REASONS MULTIWAVE

## Gentle perm treatment without thioglycolate and ammonia

### FEATURES

#### USAGE

Gentle permanent treatment without thioglycolate and ammonia

#### CHOOSE IF

- you want to perm your hair gently without irritating the scalp
- you want to use different rolling techniques
- you want to use the gentlest product possible.

- Perfume-free
- Ammonia-free
- Thioglycolate-free
- Vegan
- Packaging made from recycled plastic

### INSTRUCTIONS FOR USE

#### STEP 1 1. PREPARE

Wash your hair with a deep cleansing shampoo before the perm. If necessary, treat porous hair with a pre-treatment product such as Four Reasons No Nothing Sensitive Moisture Mist.

#### 2. ROLL

Roll hair as desired.

#### 3. PERMANENT

Select the appropriate strength of Four Reasons Multiwave Permant. Moisten each roll several times by absorbing a small amount of liquid at a time.

Cover rolls with a cap or cling film, do not use heat.

Processing time is 10minutes, follow the processing time carefully.

#### 4. INTERMEDIATE RINSE

At the end of the application time, perform an intermediate rinse with warm water. The length of the hair affects the rinse time; short hair 5-10min, long hair 10-15min.

#### STEP 2 5. NEUTRALIZING

Towel-dry hair roll by roll.

Apply the ready-to-use Four Reasons Multiwave Neutralizer. Processing time with the rods 5min. + without rods 3min. At the end of the processing time, rinse the hair thoroughly.

#### STEP 3 6. AFTER-PERM TREATMENT

Apply a minimum of 30ml of Four Reasons Multiwave Keratin Hardener to towel-dried hair. Leave on for 3min. Rinse hair thoroughly.

### PRODUCTS

#### STEP 2: Four Reasons Multiwave Neutralizer 1000ml

Ready-to-use Four Reasons  
Multiwave permanent neutralizer

#### STEP 1: Four Reasons Multiwave Perm Solution 85ml

- A | Normal, strong and difficult to curl hair
- B | Color-treated, fine and easily curled hair
- C | Bleached and lightened hair

#### STEP 3: Four Reasons Multiwave Keratin Hardener after-perm treatment 1000ml

Neutralises chemical residues  
and helps the perm last longer.  
Recommended to be used after  
Four Reasons Multiwave permanent  
treatment.

Note: Four Reasons Multiwave perm  
solution or hardener must not be  
mixed or used with products other than  
Multiwave.

# FOUR REASONS SHAPE

## Perm for all hair types

### FEATURES

- #1 For curl treatments for all hair types
- #2 Elastic, smooth curls
- #3 Blendable intensities
- #4 Mildly perfumed

**Four Reasons Shape** is a permanent liquid for all curl treatments, adjustable according to hair type. The three different strengths of the product can be mixed together to achieve the optimum, elastic curl for each hair type. Vegetable proteins create a uniform, vibrant curl texture. Mildly perfumed. Vegan formula and economical 500ml package size.

### PRODUCTS

#### Four Reasons Shape 500ml

- A | Difficult to curl hair
- B | Color-treated and normal hair
- C | Treated hair

#### Four Reasons Shape Neutralizer 1000ml

- Ready-to-use fastener
- Shape-permanent

#### How to choose the right Four Reasons Shape permanent:

Four Reasons Shape permanent has three different strengths of permanence. Four Reasons Shape perms can be mixed with each other depending on the texture of the hair to be treated and the treatment to be carried out.

Mixing ratio: If you use two different permanent fluids, mix the first 2/3, the second 1/3. If necessary, change the mixing ratio according to the hair texture.	HAIR QUALITY	Handled Untreated	Dyed	Dyed & Porous	Bleached
	<b>Thick</b>	A	A+B	B+C	C+B
<b>Normal</b>	A+B	B	C+B	C	
<b>Fine</b>	B	B+C	C	C C	

#### How to identify the different hair types:

- A | Difficult to curl hair**  
Slick and shiny even when untreated and stiff. You will notice this, for example, when you roll your hair.
- B | Color-treated and normal hair**  
Normal-feeling, untreated or colored hair. Dyed darker, to your own darkness or up to 2 degrees lighter.
- C | Treated hair**  
Naturally porous hair, which you can notice when combing, for example. Dyed more than 2 degrees lighter, e.g. bleached or bleached hair.

### MANUAL

#### 1. PREPARE

Wash your hair with a deep cleansing shampoo before the perm. If necessary, treat porous hair with a pre-conditioner, e.g. **Four Reasons Original Moisture Mist**.

#### 2. ROLL

Roll hair as desired. If necessary, protect the hairline with **Four Reasons Seal & Shine Oil** and/or cotton wool.

#### 3. SHAPE

Apply the appropriate amount of **Four Reasons Shape** liquid to the hair as shown in the table on the cap. Wet each roll several times, absorbing a small amount of liquid at a time. Cover the rollers with a hood

or plastic wrap. Leave on for 15minutes. If you use **Four Reasons Shape C** included in the mix, the time of application is 10-15minutes.

#### 4. INTERMEDIATE RINSE

At the end of the application time, do an intermediate rinse with warm water. Rinse hair for 5-10minutes depending on the length of the hair. Towel-dry hair roll by roll.

#### 5. APPLY

Apply ready-to-use **Four Reasons Shape Neutralizer**. Duration of action 5min on rolls + 5min rolls unrolled. At the end of the action time, rinse hair thoroughly. If necessary, use a **Four Reasons conditioner** suitable for your hair.

**FOUR  
REASONS  
SMOOTHING  
TREATMENT**

Smoothing vegan keratin treatment  
for professional use

**DIRECTIONS FOR USE**

**STEP 1:** Wash hair thoroughly with a deep cleansing shampoo twice. Dry your hair with a hairdryer.

**STEP 2:** Divide hair into four sections. Wear protective gloves and apply the straightening liquid with a foamer, absorbing the product evenly section by section into the dry hair. Comb hair with a dense comb from roots to crown to avoid leaving hair wet. Do not apply the product to the scalp. Leave on for 20minutes.

**STEP 3:** Continue without rinsing hair. Do not rinse without washing. If hair is still damp, blow dry gently with a blow dryer. Take sections of hair 0.5-1cm thick and process with a straightener according to the instructions below:

HAIR TYPE	TEMPERATURE	PULLS WATER
Thick, coarse, natural curly hair	200°C-210°C	15-18 times
Normal hair	190°C-200°C	12-15 times
Color-treated hair	170°C-180°C	10-12 times
Fine, damaged, bleached, bleached, natural blond, dyed red	160°C-170°C	6-8 times

**STEP 4:** Rinse hair thoroughly to remove any product residue. Apply the moisturising conditioner to the hair, leave on for 5minutes and rinse. Finally, blow-dry the hair.

**WARNINGS**

Follow the instructions for use carefully. Use appropriate gloves. Do not use the product if the scalp is irritated or damaged. Avoid contact with eyes. If the product gets into the eyes, rinse immediately. If any side effects occur, stop using the product immediately and consult a doctor. For external use only. Keep out of the reach of children. For professional use only.

**HOME CARE INSTRUCTIONS**

- Use moisturising and conditioning products suitable for the hair type.
- Avoid daily hair washing. Extending the washing frequency will help to preserve the effect of the treatment on the hair for as long as possible.
- Blow-dry hair straight after washing.

**PRODUCT DOSAGE**

SHORT HAIR	LONG HAIR	VERY LONG HAIR
20 - 30ml	30 - 40ml	40 - 50ml

**FAQ**

**1. Does the Four Reasons Smoothing Treatment fade hair color?**

If you have had extensive color changes to your hair, it is possible that the Four Reasons Smoothing Treatment may fade the color. You can strengthen and refresh your hair color after the treatment with a Four Reasons Color Mask to match your hair tone.

**2. Can I color my hair with Four Reasons Smoothing Treatment?**

We do not recommend coloring hair at same time with Four Reasons Smoothing Treatment, but you can tone hair after Four Reasons Smoothing Treatment with a low-alkaline product such as Four Reasons Luxima or Four Reasons Color Mask.

**3. I would like to do both Four Reasons Smoothing Treatment and color my hair. In what order do I proceed and how do I do the work?**

**Base coloring:** First do a base color treatment on the hair, wash and dry the hair and then do the Four Reasons Smoothing Treatment.

**Full hair color treatment:** First apply the Four Reasons Smoothing Treatment to the hair and then instruct the client to wash the hair at home 1-2 times. The hair can then be treated with a color.

**Bleaching:** First apply the Four Reasons Smoothing Treatment and then instruct the client to wash the hair at home 1-2 times. Note! After the Four Reasons Smoothing Treatment, the hair will lighten more easily; choose softer bleach/oxid for bleaching.

**4. In general, keratin treatments can leave a keratin scent in the hair. Does the Four Reasons Smoothing Treatment also leave a scent in the hair?**

Yes, it is possible. There may be an organic scent in the hair for a few washes, which will be evident when the hair is damp. The scent will disappear after a few washes. The important thing is to use the right amount of product during the treatment. Too much can contribute to the smell remaining in the hair.
