Product Range
2024

Established in 1963, Walkers Chocolates are proud to be one of the few independent, privately owned confectionery manufacturers in the UK.

Our state-of-the-art, purpose-built manufacturing site, based in Birmingham, specialises in the production of a wide range of chocolate and confectionery products which include:

- ✓ Filled and moulded chocolates
- ✓ Chocolate bars
- ✓ Truffles
- ✓ Easter speckled eggs
- ✓ Mint imperials.

With a category and trend led approach, we provide both private label and own label branded products to offer enhanced flexibility and choice for our clients.

We manufacture and supply chocolate products for some of the UK's biggest retailers, as well as clients in 52 countries worldwide.

Our core values:

Quality

A reputation which has been built on quality

Excellent Value

Driven by competitive British manufacturing

Investment in people

Nurturing talent to deliver the highest levels of service

Innovation

Innovation in flavours, products, packaging and process

Capabilities

Production capabilities at the Walkers Chocolates site focuses on maintaining the highest quality of standards and production.

We are committed to maintaining high exacting standards that meet and exceed our customers and ultimately the consumers expectation.

Filled chocolates, including assorted chocolate and chocolate thins are a particular strength of Walkers, whereby specialist manufacturing features fully automated picking, packing and wrapping processes.

Walkers Chocolates is fully FDA approved, an accreditation which enables supply and distribution into several overseas markets, including: Europe, Asia, Australia, and New Zealand, Africa, USA and South America, all whilst being lovingly made in Britain.

Sustainability

We recognise that in conducting our business we have an impact on the environment and therefore a shared responsibility to minimise the depletion of natural resources, reduce waste and affect climate change.

Sustainability is an integral part of Walkers Chocolates corporate philosophy, and we are taking steps every day to become a more sustainable business and our Borehole project, is an expression of our commitment to our sustainable journey.

What we achieved so far

- ✓ Thermal roof panels installed in tank farm
- ✓ Thermal jackets installed on tanks
- ✓ New tanks completely insulated
- ✓ Reviewing current and future energy use
- ✓ Solar Panels installed
- ✓ LED lighting being installed
- ✓ Appointment of energy consumption and carbon reduction champion – Tahir Amir
- ✓ 1st Electric Vehicle purchased
- ✓ Ensuring compliance with relevant existing environmental legislation, regulations and voluntary codes of environmental conduct appropriate to our business

Our plan - 3 to 5 Years

-  Move from plastic bagged products to a paper substrate plastic free certified
-  Carbon offset deliveries
-  100% of cocoa and other ingredients ethically sourced
-  100% of all packaging to be either recyclable or compostable

WALKERS
CHOCOLATES

Cocoa sustainability

67%

of our cocoa comes from certified schemes from Barry Callebaut. The schemes are Rainforest Alliance and Fairtrade.

Ecological protection

We are aware of our impact on the environment which is why we are moving to RSPO palm derivatives from sustainable sources.

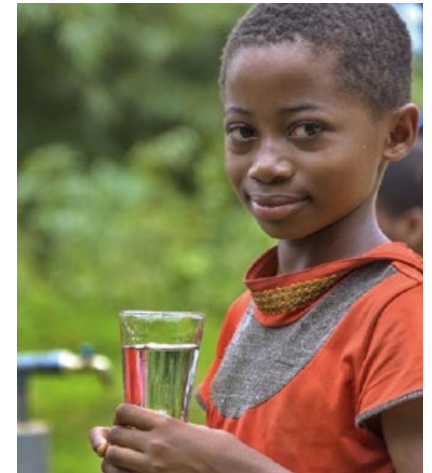

Malawi Water - Borehole Project

We work with and support charities bringing fresh water to remote villages in Malawi.

In Malawi, more than 13 million people have no access to clean water.

Over 80% of the population live in rural areas and still drink water from unprotected sources. This increases the risk of outbreaks of water-borne diseases.

Children, in particular, suffer from water-borne diseases in the country.

Achievements:

▶ We started the Water Borehole digging project in Sep 2014, for providing deep water boreholes that will exist for years.

▶ 1,148 boreholes have been successfully working and have benefitted a population of about 287,000 people.

▶ 134 boreholes were abandoned due to dry holes and collapsing of the pits.

▶ The Water Wells Project in Malawi has constructed 1,282 boreholes in total.

Recycling

✓ Engineering oils of all types are recycled, along with all inks and solvents. These are stored in bunds on site then removed for recycling.

✓ Light tubes again, are stored after use in tube coffins and are disposed of through a licensed contractor.

✓ The next phase of the recycling is to recycle all aerosols and all electrical cabling.

✓ All waste metal on site is stored in an on-site skip and collected then removed for recycling by a third party.
