

## PROCLIMB OIL TURBO OIL DELETE

- Tip sled on its side
- drill rivets on bottom plate

- Remove banjo fitting then
- take oil hose off of banjo

- Using a syringe fill the line with 2 stroke oil then hook it to other side of union and clamp it.
- Now you can remove syringe from other end of hose.
- Then the hose with grease zerk hook to the banjo fitting then tighten fitting down. Now get some grease and put grease in the line till you see it come to banjo.
- Then add 1 more squirt of grease.

Put union in hose and slide clamp back on

Then you will put 20ML of oil into turbocharger with syringe.  
Now hook oil line to turbocharger and clamp it.
