

RGF-PKG™ Air Purification System

The RGF-PKG™ package unit uses RGF's patented Photohydroionization® (PHI-CELL®) technology to reduce airborne and surface bacteria, viruses, odors, VOCs (chemical odors), and mold*. RGF-PKG™ package units are designed specifically for use in residential and commercial applications. They utilize adjustable magnetic feet with vibration dampers to attach without fasteners to the HVAC blower unit or PKG Rack System, making installation fast and simple. RGF-PKG™ package units are available with 5", 9" and 14" PHI-CELLS®.

RGF's new PKG-Rack™ systems are often used for commercial installations where several RGF-PKG™ package air purification units are required. Each PKG-Rack™ system provides convenient installation for up to eight (8) PKG-14 units. The PKG-Rack™ system offers customer the ability to quickly and efficiently add active air purification to the largest commercial air handlers and roof top HVAC systems.
