Connection

There are two configuration mode (Bluetooth Mode/ Quick Mode) available for you to add the device.

Bluetooth mode is recommended.

*Connect your phone to Wi-Fi network (Only supports 2.4GHz Wi-Fi network, not for GHz Wi-Fi network).

*Your smart phone must be Android 5.0+ or iOS 10.0+

1. Bluetooth Configuration

Step 1 Turn on your phone's Bluetooth. Plug the lamp with the 5V power supply to power ON the device.

Step 2 Confirm if the light is in Red blinking rapidly status (flashes twice per second). If it does not flash or flash slowly (flash every two seconds), please long press the ON/OFF button on the controller box for 5 seconds and wait for the light turns to Red fast blinking status.

Step 3 Access to the App, click icon “+” or “add device”. The device will pop up automatically, click “Go to add”.

Step 4 Input your Wi-Fi password, click “Next”. Wait for the device connected to the network.

Step 5 Once added successfully, you can set the nickname as you like.

2. Quick Mode Configuration

**At this mode, please turn off your phone's Bluetooth.*

Step 1 Power ON the device, make sure the light is in Red fast fast blinking state for Wi-Fi connection.

Step 2 Access to the App, tab icon “+” or “Add device”, choose “Strip Light(BLE+WIFI)” from “Lighting”.

Step 3 Input the Wi-Fi password, click “Next”, tick the box of “Confirm the indicator is blinking rapidly”. Wait for the device connect to the network, once added successfully, can you set the nick name as you like.

Product Installation

Insert the Type-C interface into the charging Port on the back on the light.
