After you download the App, please complete the networking configuration according to the Temperature & Humidity Sensor manual, or you can complete the networking configuration according to the prompts on the App and make sure it can work normally.

Product Description

Monitor your environment in real-time with this smart sensor. It accurately tracks temperature and humidity, connects to your Wi-Fi network, and sends instant alerts to your phone via a mobile App. Perfect for homes, offices, and storage areas, it helps you stay informed and in control—anytime, anywhere.

Product Features

- 1- Real-time monitoring of temperature and humidity
- 2- Wi-Fi connectivity (2.4GHz)
- 3- Mobile App control and notifications
- 4- Historical data tracking
- 5- Compatible with Alexa and Google Assistant (If Supported)
- 6- Adjustable data reporting intervals

Device Setup:

1. Power On the Device

Plug in the sensor using the included USB cable or insert batteries.

Wait for the LED indicator to blink, indicating pairing mode.

2. Download the App

Download the Okasha smart App from the App Store or Google Play.

Create an account or log in.

3. Connect to Wi-Fi

Ensure your phone is connected to a 2.4GHz Wi-Fi network.

Open the App and tap "Add Device."

Choose "Temperature & Humidity Sensor" from the list.

Follow the in-App instructions to connect the sensor to Wi-Fi.

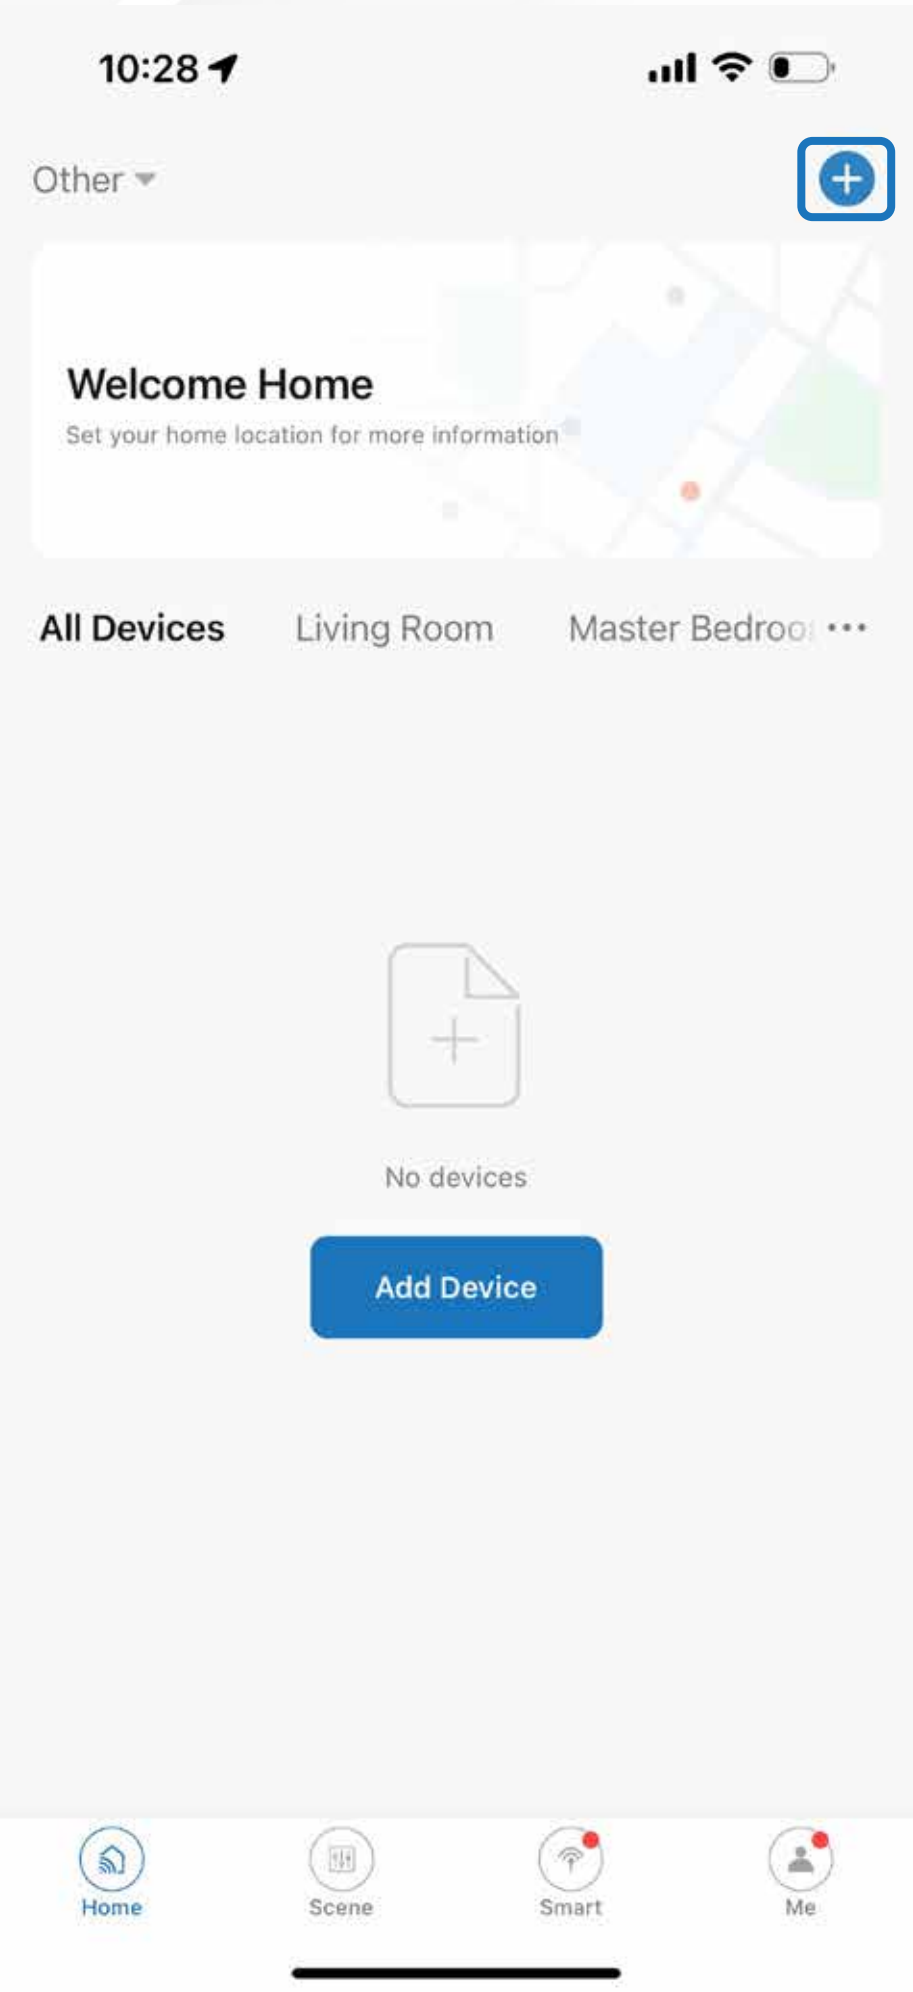

4. Installation Tips

Mount the sensor at chest height for best accuracy.

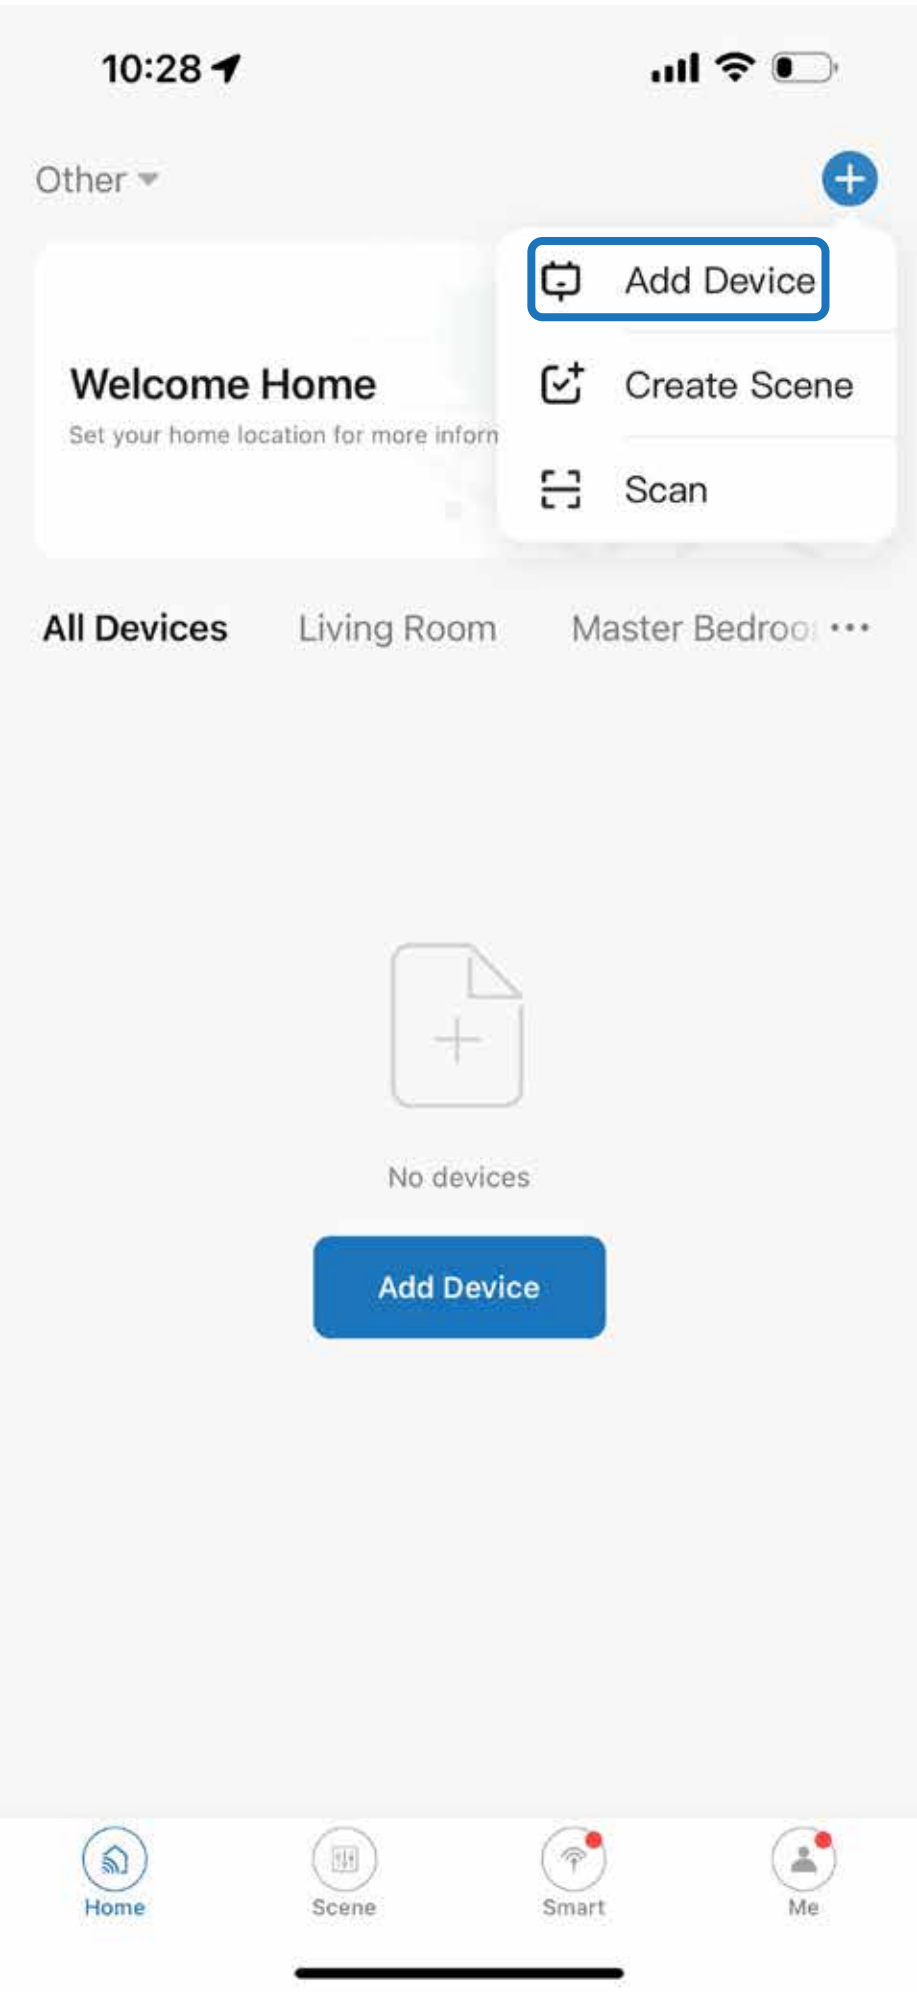

Avoid placing it near heating or cooling sources.

For wall mounting, use the adhesive or screws provided.
