## WE NEED:

**FIVE** 230 V AC Sockets

**TWO** mics, one for each Guitar Cabinet

**ONE** mic for the Bass Cabinet, **NO** DI-Box

**MULTIPLE** mics for the Drums (as much as FoH allows and what is needed to get a good sound)

**TWO** XLR signals for In-Ear Monitoring. Please add ambient sound to the mix. (Room and Audience)

**IF POSSIBLE:** A projector for our video backdrop

## SOUND:

We try to achieve a **WALL OF SOUND** with very deep and powerful tones. The more you can feel the bass the better.

### **GUITAR** and **BASS:**

We prefer minimal processing and effects.

### **DRUMS:**

We prefer an open and unmuffled sound. Please **NO** clicky attack sounds and avoid using gates unless it is unavoidable.

### **VOCALS:**

We prefer minimal processing on the voice and a very slight **delay** with a bit of **reverb**.
