

How to calculate $102 - 65$

$$\begin{array}{r} 102 \\ - 65 \\ \hline \end{array}$$

Line up the numbers vertically in each place.

Calculation of the ones place

$$\begin{array}{r} 102 \\ - 65 \\ \hline \end{array}$$

You cannot regroup from tens place, so you need to regroup the hundreds place first.

$$\begin{array}{r} 912 \\ - 65 \\ \hline \end{array}$$

Then, you need to regroup from the tens place.

$$\begin{array}{r} 102 \\ - 65 \\ \hline 37 \end{array}$$

$$12 - 5 = 7$$

Calculation of the tens place

Since you regrouped, it becomes 9.

$$9 - 6 = 3$$

$$102 - 65 = 37$$
