

GREEN LIVING FENCE

The Green Living Fence consists of a steel grid, densely intertwined with climbing plants. The plants are supplied in a coconut fibre root container filled with potting soil, with a strong metal frame. The coconut planter is a mixture of coconut fibres (coir), held together by natural latex. Once the Green Living Fence is installed, the biodegradable coconut planter completely degrades within one to two years. This system allows the full, healthy development of the hedge and its root system. The ready-made Living Fences can be installed all year round, however avoid planting during a prolonged frost.

BENEFITS

- Instant privacy and greenery result
- Easy and fast to install
- Contributes to biodiversity
- Contributes to a healthy environment
- Improves air quality
- Reduces fine dust with 40 - 60%
- Contributes to the greening of urban areas

FEATURES

- Fully grown
- Available in different heights and types
- Certified sustainable production
- Can be planted throughout the year, except during frost periods
- Biodegradable pot made of coconut fibres
- Environmentally friendly
- High-quality fencing with 10 year guarantee

TECHNICAL INFORMATION

DIMENSIONS

- The ready-made Green Living Fence is available in various height options: 1, 1.55, 1.8, 2, 2.2 and 3 metres. All screens are supplied 1.2 metres wide as standard.

INSTALLATION EQUIPMENT & ACCESSORIES

- Installation of a Green Living Fence may require anchoring (posts and brackets) and accessories (grid extensions, gates).

THE RIGHT SOIL

- Green Living Fences require soil rich in humus, suitable for planting shrubs. The trench must be at least 40 cm deep. The soil should be water-permeable, with good surface water drainage. The soil should be free of debris, impermeable clay layers, etc. If the soil is not rich in humus, a good quality compost should be added. Careful preparation of the soil is essential for the hedge to grow.

INSTALLATION

- Watch the extensive installation guide and videos on our website.

MAINTENANCE

- Visit our website for more information on maintenance.
