

How to factory reset the Marquis IP cameras with search tool?

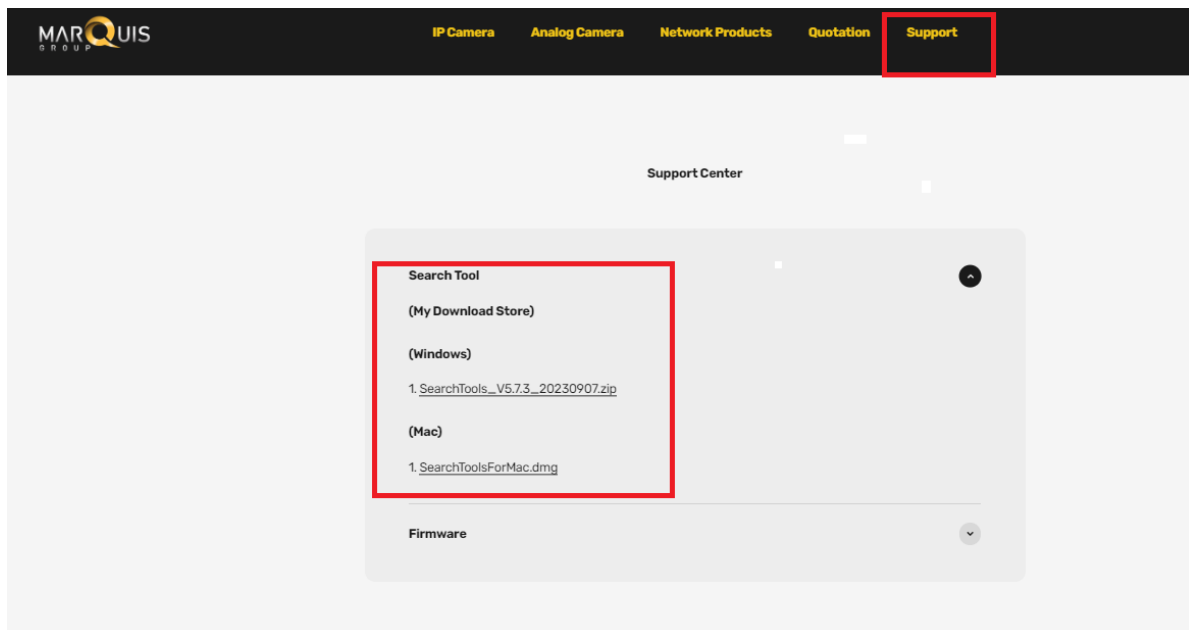

Step 1

Connect the Marquis IP Camera to a PoE Switch that support 802.3 at/af (the most common PoE switch on the market).

Step 2

Download the IP Search Tool on from the Marquis Store (<https://marquis-store.com/pages/support>)

Select Search Tool for Windows or Mac depends on your PC devices.

Step 3

Open the Search Tool and click "Start Search"

Now, you should be able to see the IP address of the camera.

If not, make sure your PC is on the same network as your IP camera. Sometimes, even when using the same Wi-Fi router, you might be connecting to a different network with your camera.

<input type="checkbox"/> 192.168.1.17	80	YML12_STARIRCN	Camera		YML12_STARIRCN_AF_V1-A_Y_EN-RTMP-M5_L V3...	Login success	close

Step 4

Check the IP camera IP address, then click Batch reset.

Wait for a minute until status show "Login Success"

The screenshot shows the 'IP camera search tools V5.1.5_20200914' application window. At the top, there are search parameters: 'admin' for the username and '123456' for the password. A table below lists search results. The first row is selected, with its IP address '192.168.1.17' highlighted in a red box. A modal dialog box titled 'Please confirm' is centered on the screen, asking 'Are you sure to restore the factory settings?' with 'Yes' and 'No' buttons. The 'Yes' button is highlighted in a red box. At the bottom of the window, there is a row of action buttons: 'Batch Reset' (highlighted in red), 'Batch Reboot', 'IP Batch Setting', '50HZ/60HZ', 'Batch Set Language', 'Batch Sync Time', and 'Batch Set Password'. Below these buttons is a section for 'Upgrade Firmware' with a file path and a 'Browse...' button.
