

Nutriquire + terrasym + DUST

New addition to BioStax™ product line-up

Nutriquire + Terrasym + DUST is a synergistic combination of spore forming and symbiotic siderophore producing microbials applied in the planter box providing ease of use, improved plant nutrient uptake and return on your investment.

DUST is a patented Bio-Complex inclusion carrier providing a perfect environment for hosting biologicals leading to a long shelf life. DUST also provides a yield-enhancing amino acid food source to the sprouting roots for stronger plant vigor right out of the ground.

FOR USE ON

✓ CORN

✓ SOYBEANS

KEY BENEFITS

- Improved soil nutrient uptake
- Allows for greater iron and manganese uptake
- Provides protection around the seed through competitive exclusion

IMPACT ON THE PLANT

- **Crop Stress mitigation**
Utilizes nutrients and water more efficiently allowing the plant to continue to operate despite difficult growing conditions.
- **Improved Soil Nutrient Uptake**
Microbes within Nutriquire + Terrasym + DUST release enzymes that attach to micronutrients and deliver to the plant.
- **Improved Ear Fill**
Microbes help improve nutrient uptake throughout the entire season leading to improved ear fill.
- **Seed Flowability**
Provides a cleaner, safer lubrication and improved singulation compared to talc/graphite.

- **Potassium Availability**
Mineralizes potassium more efficiently allowing for enhanced pod fill.
- **IDC Tolerance**
Minimizes the impact of iron deficiency in the plant by allowing for greater iron uptake. Data shows average of 19.4% increase in the leaf tissue compared to the control.
- **Iron Uptake**
Bacteria within Nutriquire + Terrasym + DUST produce siderophores which bind iron and concentrate it in the root zone as a plant available form.

APPLICATION

Individual/Single Row Units

Step 1
Remove provided scoop from packaging

Step 2
Using the scoop and application rates listed sprinkle Nutriquire + Terrasym + DUST into the individual/single row unit and stir gently for uniform seed coverage

 Apply one half (1/2) scoop for every one (1) unit of seed.

Bulk Application

- Mix product into recommended units of seed, alternating between pouring seed and product for uniform seed coverage.
- For Bulk Application use scoop to sprinkle powder on seed into large black "Pro-Box" and mix in before putting seed in tender.
- Or apply in "seed pool" at the base of the auger when seed is moving up into planter.

Packaging

- Soybeans
8 x 20 oz.
- Corn
8 x 12.5 oz
