

Nutriquire

BENEFITS

- Enhances fertilizer program by increasing plant nutrient uptake
- Improves germination and plant vigor
- Increases root mass growth
- Improves water infiltration
- Improves soil environment for plant growth by building the aerobic zone of the soil
- Stimulates soil microorganisms that provide essential nutrients for plants through their productive biological processes

APPLICATION RATES

- **Soil Applied:** Sandy soil 32 ounces to the acre, clay or high organic matter soil 32 ounces to the acre.
- **In Furrow:** with seed at planting.
- **Foliar:** 32 ounces to the acre
4-6 leaf or V7 to silking/tasseling
- **Packaging:** Packaged in 2 x 2.5 gal cases or 275 gal totes.)

METHODS OF APPLICATION:

- Can be applied through overhead, aerial irrigation and mixed with sprayer tank containing start up fertilizers and/or herbicides.
- Ensure tank is free of residue, avoid or treat chlorinated water if possible.
- Do not apply when a crop is severely stressed.
- Do not mix with fungicides or insecticides and do not apply within 2 weeks of applying fungicides.
- May be mixed with a 2,4-D herbicide, and glyphosate.

For Use On: Corn, Soybeans

Nutriquire Soil Inoculant is a microbial-based product intended to increase the active biomass in the soil. Nutriquire introduces microbes into the soil resulting in improved plant vigor and nutrient cycling. Many of the bacteria found in Nutriquire are spore forming bacteria allowing for flexible mixing and application options.
