

APPLICATION RATES:

Swine Manure: Apply 2.5 Gallons per 2,400 head hog building each month. Apply each month that you have missed since pump-out as a “shock” treatment. For example, on a 2,400 head building if it has been 4 months since the last manure pump-out apply 10 gallons as a shock treatment then begin maintenance of 2.5 gallons per month.

Dairy Manure: Apply 2.5 gallons per 250 head (1 gallon per 100 head) each month. For best results concentrate product application during months when the lagoon is not frozen. If you miss application months in the winter due to frozen lagoons apply missed product as a shock treatment in the spring when lagoons thaw.

Crop Residue: Apply directly to residue at a rate of 1 to 2 quarts per acre with adequate water for coverage. Apply as soon after harvest as possible.

FOR BEST RESULTS:

- Apply product directly to sections of the hog house that have the highest solids accumulation.
- Begin program with a minimum of 3 months remaining until pump-out
- Do not apply in dairy washout systems that contain high levels of anti-bacterials.

Note: Storage temp (50-90 F). Mix with water. Due to the wide variety of uses and variations in severity of areas to be treated, specific application rates and procedures are best determined on a case by case basis. For assistance, please call YieldMaster Solutions (605) 860-8534.

SAFE HANDLING INSTRUCTIONS:

- Use only as directed on the label.
- Shake well before using.
- Keep out of the reach of children.
- Eye Contact: Flush with water/call physician.
- Skin Contact: Exposure may result in dry skin. Rinse/Apply lotion.
- Ingestion: May cause nausea or vomiting. Seek immediate medical attention.
- In case of spills disperse with water, treat like surfactant or soap spillage.

NutriPhi

INGREDIENTS

A broad and diverse population of live naturally occurring beneficial microorganisms: Bacillus sp., Pseudomonas sp., Arthobacter sp., Actinomycetes sp.

This product contains more than 10 million microorganisms per milliliter.

ENVIRONMENTALLY SAFE & NON-PATHOGENIC
