

PERFECT VEHICLE FIT LIGHTBARS

SPIDER REAR SUV LIGHTBAR

The Spider lightbar is a single or dual LED color warning light system that seamlessly integrates the power of a lightbar into the rear body of an SUV. The Spider is uniquely designed to conform to the contour of police SUV's and provide the most effective light output available without compromising rear window visibility.

10 Available Color Combinations: Amber/Amber, Amber/White, Blue/Blue, Blue/White, Green/Green, Green/White, Red/Blue, Red/Red, Red/White, White/White

SPI-XP2002-XX

SPIDER INTERIOR LIGHTBARS

The Spider High Intensity, low profile, interior LED lightbars is a full featured bar with the light output of a full sized exterior lightbar. Designed to mount in the upper front windshield or rear deck and customized for all popular emergency response vehicles the low profile design is perfect for undercover and slick top vehicles. The lower shroud fits snugly along the contour of the windshield to prevent flashback while the upper part of the housing fits the contour of the headliner. Eight 6 LED forward facing lamp modules, two 45° intersection clearing modules plus two, adjustable angle, flashing takedown modules insure optimum light output even through heavy window tint.

The Spider Interior Lightbar has models to fit the Taurus, Explorer, F150/250, Caprice, Impala, Tahoe, Silverado, and Charger.
