

THOR

TOMAR HANDHELD REVOLUTION LED LIGHT

THoR is a portable, durable, rechargeable handheld LED light. It can be used as a flashlight or hands-free scene light. THoR provides situational flexibility rarely seen in other flashlights or portable flood light technologies currently available.

KEY FEATURES

- Designed, engineered, and built in-house using TOMAR's superior optical technology
- Weather sealed using TOMAR's patented vibration sealing process
- Utilizes TOMAR's Revolution Series LED technology (3X7 lamp size)
- 12 LED lights optimized for maximum lumen output
- Available in either a flood or spot beam pattern
- Utilizes DeWalt's 20V battery technology for fast recharging
- Average of 3 hours of use on a single battery charger
- Hands-free design
- Large trigger ideal for use with gloves

Flood Beam Pattern:

The flood optics uses an 80° beam pattern that provides complete scene illumination. This beam pattern is perfect for first responders, campers, or off-roaders that need to illuminate a large area at once. (R37L-F-20V)

Spot Beam Pattern:

The spot optics uses a 9° beam pattern that provides a narrow and long beam that focuses the illumination to a specific spot. This pattern is perfect for individuals who want to use the THoR as a portable spotlight. (R37L-S-20V)

What is Included:

- 1- THoR LED light
- 1- DeWalt 20V Battery
- 1- DeWalt 20V Battery Charger
