

BSES, Battery Service Equipment Set

Part #: 746X100

NSN: 6130-01-541-9731

Description:

The Battery Service Equipment Set allows you to set up a battery recovery and recharge operation anywhere in the world in minutes. This equipment is the cornerstone of a Battery Management Maintenance Program. The BSES provides battery diagnostics, preventative maintenance and corrective solutions. It can stand alone as a battery shop or be used to augment or update existing equipment in a battery shop.

All chargers have universal power input, single switch operation and colored LED indicators. These features minimize operator training and make recovery, charging and maintenance of lead-acid batteries simple, easy and accurate.

This Equipment Set contains:

- (1) Pro-HD, 12/24-Volt Smart Recovery Charger on Wheels **NSN: 6130-01-500-3401**
- (1) HD PC-12, Pallet Recovery Charger **NSN: 6130-01-532-7711**
- (1) Pro-12, 12-Station Battery Maintainer **NSN: 6130-01-535-2718**
- (1) 490PT+, Digital Battery Analyzer Tester and Printer **NSN: 6130-01-510-9594**
- (10) MBT-1, Mini Battery Load Testers **NSN: 6625-01-463-8499**
