390PT and 777P-PT Battery Analyzers

Test 6V and 12V lead-acid batteries in or out of your vehicle as well as 12V and 24V charging systems for proper operation. Both of these battery analyzers display both battery voltage and cranking amp capacity in seconds. The 777P-PT also has a built-in printer making it an essential tool for diagnosing battery condition and record keeping.

Don't throw away old or spent batteries - recover them!

Recover heavily discharged and sulfated 12V batteries (VRLA, AGM, gel or flooded cell) with one of PulseTech's suitcase recovery chargers. Their patented Pulse Technology removes and prevents sulfate crystals from the battery plates increasing the battery's ability to accept, store and release energy.

Part No: **745X810** Model: **SC-12** (Recover 12 batteries at a time)
Part No: **745X816** Model: **SC-6** (Recover 6 batteries at a time)
Part No: **745X814** Model: **SC-2** (Recover 2 batteries at a time)

Maintain Batteries In Your Shop

PRO-12-RP 12-Station Battery Maintenance System

Don't let new or used batteries discharge before you've even used them. Keep as many as 12 stored 12-Volt lead-acid batteries fully charged and in 'factory fresh' condition until you're ready to use them. LEDs indicate the status of each battery.

Maintain Batteries In Your Vehicles

SP-12

Use the Power of the Sun to Extend the Life and Power of Your Batteries

PulseTech's SolarPulse solar chargers prevent the normal loss of battery power on vehicles and equipment stored outside and apply our sulfate killing patented Pulse Technology. Your batteries will remain in peak condition, even when sitting for months at a time, dramatically reducing jump starts.
