

POPULAR ORIGINAL EQUIPMENT MANUFACTURERS USE PULSETECH PRODUCTS TO ALWAYS KEEP THEIR BATTERIES FULLY CHARGED AND READY!

DRIVEN BY UPTIME

International Used Truck Centers, owned and operated by Navistar Inc., deliver on the promise of being on the road and staying there.

Pulsetech's recently upgraded SolarPulse Solar panels are more powerful than ever before and are the most durable on the market, making them a favorite choice for many Original Equipment Manufacturers.

Navistar is a leading manufacturer of commercial trucks, buses, defense vehicles and engines. Navistar is driven to deliver a better future with strong products, sound values and solutions for a changing world.

The popular PulseTech Products ensure your equipment starts when it is needed by keeping the batteries fully charged at all times. No more worries about jumpstarting critical equipment and waiting for the project to start. Plus they are simple to install in just a few minutes.

PulseTech creates a safer environment helping to increase customer satisfaction and profits for individuals and companies along the way.

Patented Pulse Technology makes your batteries perform better and last longer than any other solar panel or charger in the market.

In addition to charging the battery, our patented Pulse Technology removes sulfates from the battery plates and prevents new ones from forming. No other chargers on the market have this technology.

PulseTech Solar Battery Maintainers

SolarPulse solar battery maintainers prevent the normal loss of battery power on vehicles stored outside and apply PulseTech's patented high frequency Pulse Technology waveform to the battery. By preventing and removing sulfate deposits on the battery plates your battery will have increased power and performance and will last up to three times longer.

When compared with competitors, SolarPulse solar panels are virtually indestructible and impervious to weather, aging and damage from installations in harsh or rugged use environments.

SolarPulse solar maintainers work on all 12-volt lead-acid batteries including AGM, Gel and standard flooded cell batteries.

- Patented Pulse Technology extends battery life 3X
- Removes sulfates from the battery plates so more room is available for energy storage
- Dramatically reduces jumpstarts
- Results in more powerful, dependable batteries
- Improved battery performance
- Offsets high parasitic loads
- Completely safe with no danger of overcharging

SP-3 3-Watt Solar Battery Maintainer

Application: For single batteries with no electronic accessory power draw

SP-3 Specifications			
Max Charge Current	240 mA	Solar Panel Dimensions	4.7"L x 9.45"W x 0.25"H
Output Voltage, Bulk Charge	16.5 V dc	Circuit Box Dimensions	3.4"L x 2.25"W x 1.5"H
Lug Cable Length	3'	Main Cable Length	17'

735X453 SP-3 3-Watt 12-Volt Solar Battery Maintainer

SP-7 7-Watt Solar Battery Maintainer

Application: For small multiple or single batteries with some electronic accessory power draw

SP-7 Specifications			
Max Charge Current	450 mA	Solar Panel Dimensions	10.25"L x 8.85"W x 0.25"H
Output Voltage, Bulk Charge	16.5 V dc	Circuit Box Dimensions	3.4"L x 2.4"W x 1.5"H
Lug Cable Length	3'	Main Cable Length	17'

735X467 SP-7 7-Watt 12-Volt Solar Battery Maintainer

SP-12 12-Watt Solar Battery Maintainer

Application: For larger or multiple batteries with high electronic accessory power draw

SP-12 Specifications			
Max Charge Current	750 mA	Solar Panel Dimensions	12.41"L x 9.85"W x 0.25"H
Output Voltage, Bulk Charge	16.5 V dc	Circuit Box Dimensions	3.4"L x 2.4"W x 1.5"H
Lug Cable Length	3'	Main Cable Length	17'

735X468 SP-12 12-Watt 12-Volt Solar Battery Maintainer
