There are now hundreds (and growing fast) of the new 890PT Diagnostic Testers in the field! As a result, we are now getting questions on where to get replacement paper.

The 890PT uses a thermal printer with common 2-1/4" width and up to 85' length thermal paper. The replacement paper can be purchased at any on base supply center.

Example: All Envision locations have multiple options. A few are listed below:
5 roll box (55'L): Part # ICX90781283
50 roll box (55'L): Part # ICX90783066
50 roll box (85'L): Part # ICX90720005

## 890PT Tester:

**CLIX NSN: 6130-01-728-2595**

6, 12, and 24V Tester!
New SATS, FRS and SECM Tester.

The 890PT was also designed for quick, simple and easy replacement paper loading. Just 3 Steps!

1. Open the printer lid.

2. Place a new paper roll into the tester, ensuring the edge feeds from the bottom and pull a small amount out.

3. Close the lid and print as needed!
