

Happy Winter everyone and hopefully Spring comes early this year for those of us living with the cold!

We regularly get questions on which is the best multi-station charger for shop operations? This really depends on equipment density, optempo, shop space, and the simple answer is we really have multi-channel charging systems for really any size operation!

### Common Features for all PulseTech multi-station chargers:

- All our multi-channel systems have independent channels which operate / charge in isolation from one another allowing any combination of batteries to be charged at once.
  - Simultaneously charge any 12V (24V for Dual 24) combination of batteries (VRLA / AGM, Gel or flooded cell) while still on the equipment or removed.
  - 24/7/365 charging / maintaining AND capable of charging on equipment with no need to disconnect battery cables.
- Fully automated Smart technology; **Auto Diagnose, Recover, Charge and indefinitely Maintain.**
- Patented, High Frequency Pulse Technology (25k per second) proven to help remove sulfate crystals.
- One switch operation (on/off) with easy-to-read LED indicators indicating battery status and universal power input (100 to 250 Vac) operation anywhere in the world.
- Reverse polarity protected, no spark between leads, rugged military casings and the Pallet / Pro-PC Chargers have repair parts with NSNs: charging cards, cables and more.

**Pallet Charger**  
NSN 6130-01-532-7711

**Pro-PC-12 Charger**  
NSN: 6130-01-670-6428

**Pro-PC-6 Charger**  
NSN: 6130-01-670-6729

**SC-6 Charger**  
NSN: 6130-01-694-3664

**SC-2 Charger**  
NSN: 6130-01-689-4211

**Dual 24V Charger**  
NSN: 6130-01-609-9818

We still see a lot of older ProHDs and Pallet Chargers in the field. In reality, many of these have seen some much better days and could really use an UPGRADE! It's simple: just pull 2 bolts, remove the old insert and drop-in a \*complete new insert. This also saves some big \$ vs charger replacement.

**ProHD Charger Insert**  
NSN: 6130-01-645-5003

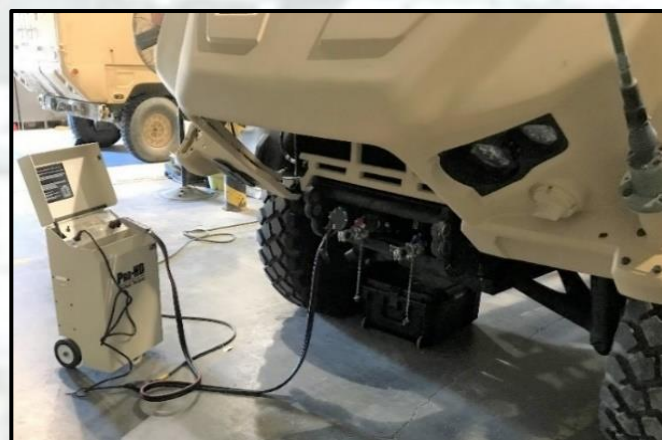

**Pallet Charger Insert**  
NSN: 5998-01-691-0141

\* Replacement Inserts come complete with all new internal wiring, power supplies, charging cards, fans, etc.

What is your best bet for a daily use, on the shop floor charger? **The ProHD!**

- Capable of recovering 12 or 24V battery packs on equipment **WITHOUT** having to remove batteries or even disconnect cables!
- Auto sensing **12 & 24V** pulse charger that comes with clamps & NATO connectors.
- Capable of charging up to **12 batteries in series / parallel!**
- **NSN 6130-01-500-3401**
  - Standard on all SATS.
  - Authorized in any Army or USMC shop.
  - Now authorized for any AF GSE shops.
  - Stocked by DLA and Multiple NSN Repair parts (including the drop-in insert)!
