

# CAFE CURTAIN - MEASURING GUIDE

Whether you choose to order a classic pocket top, or pleated cafe curtain, the measurements we require are the same.

**While there's no right or wrong way to position our curtains, we generally recommend...**

- Mounting your pole or wire in the middle of the flat sections of frame either side of the window.
- In line with the sash join/window bar.
- Your curtain should almost reach the sill, stopping 1cm short

**\*\*If an East London Cloth curtain rod also being ordered please see our pole guidance PDF.**

## Curtain Width-

- Simply provide us with the width of the pole or wire (A-B).
- As your curtain will always have some gather absolute accuracy is not essential.

## Drop -

- Using the same bracket centre points (A&B), measure down to the sill (C&D) then subtract 1cm.
- Check both sides (A-C & B-D). If they're different use the shorter measurement.
- Round down to the nearest cm if required. A few mm shorter will have little to no effect on finished look of your curtain.

## Bay Windows-

- When measuring for a bay window each window should be treated individually. Order in the same way as if the windows were completely separate

## Triple Windows -

- We recommend 3 curtains, one for each pane. We offer our poles with a second centre bracket for these windows.

## FAQs.

### I'm not confident to measure, can you help?

- Because our curtains have a small amount of gather there is some room for error on the width measurement, being a cm or two off in either direction will have little impact on the finished look. For the drop measurement its best to make it slightly shorter if you're not sure, an extra cm of space between the curtain bottom & sill will be completely unnoticeable.

### Do I need to factor in any changes in my width measurements so my curtain has gather/bunching/rouching?

- No, each East London Cloth curtain comes made to size with our signature amount of gather, we work this out for you, please just enter the pole width.

### Do I need to change my drop measurement if I'm having pencil pleat?

- No, we'll account for this & reduce accordingly.
