

# Wall Art Hanging Instructions

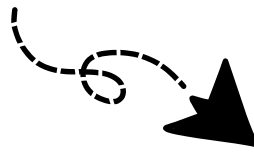

## Some tools you may need:

- Wall Hooks
- Hammer/drill
- Pencil
- Measuring tape
- Liquid Level

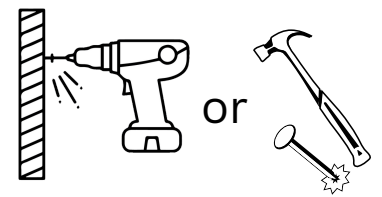

### Step 1

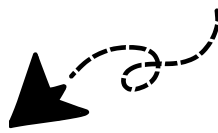

Mark wall anchor locations;  
make certain the marks are  
level and spaced apart

### Step 2

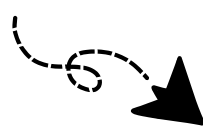

Make holes using a  
Drill/hammer & nail, 3/16"  
diameter through the  
drywall

### Step 3

Carefully drive the drywall  
screws into the anchors, leaving  
the screw head protruding  
from the wall surface as shown

### Step 4

Finish up by checking the  
placement with a level and  
nudging a side up or down  
as needed. What looks  
right up close may look  
slanted from afar!
