SendIt Sailing Lifeline Measurement Guide

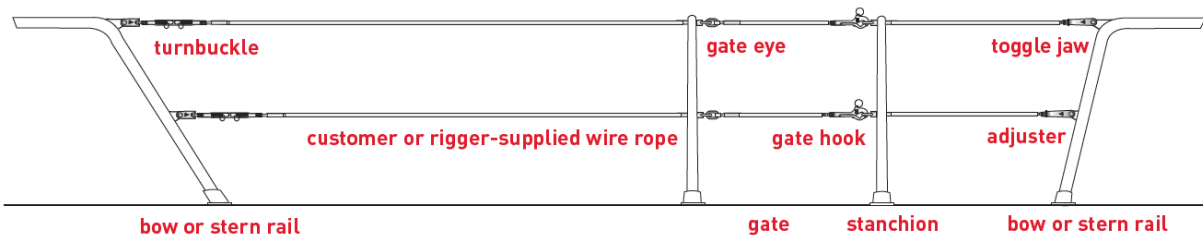

It's essential to measure both sides of your boat, as dimensions often differ from one side to the other. If your boat doesn't have gates, measure from the eye on the forward fitting to the eye of the aft fitting, for both the upper and lower lifelines. Put this info in the top 2 rows of this form.

Lifeline Order Form					
	Port	Starboard	Wire Diameter	Aft Fitting	Forward Fitting
Overall Upper					
Overall Lower					
Upper Forward					
Lower Forward					
Upper Gate					
Lower Gate					
Upper Aft					
Lower Aft					
Upper Stern Gate					
Lower Stern Gate					

Measurement Points:

- **Overall Upper/Lower:** Distance from the Bow Pulpit Padeye to the Stern Pulpit Padeye.
- **Upper/Lower Forward:** Distance from the Bow Pulpit Padeye to the Inside of Gate Stanchion.
- **Upper/Lower Gate:** Distance between the Forward and Aft Gate Stanchions (Inside).
- **Upper/Lower Aft:** Distance from the Stern Pulpit Padeye to the Inside of Gate Stanchion.
- **Upper/Lower Stern Gate:** Distance between the Padeyes on each Stern Pulpit.
